UI/UX DESIGNER

PORTFOLIO

PEAKVENTURA APP

Designed for the dynamic Gen Z, this mobile app provides lightning-fast info for your adventures. Discover new destinations, track your journey, and connect with fellow explorers—all in one sleek, user-friendly platform.

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

HIDRO WEB

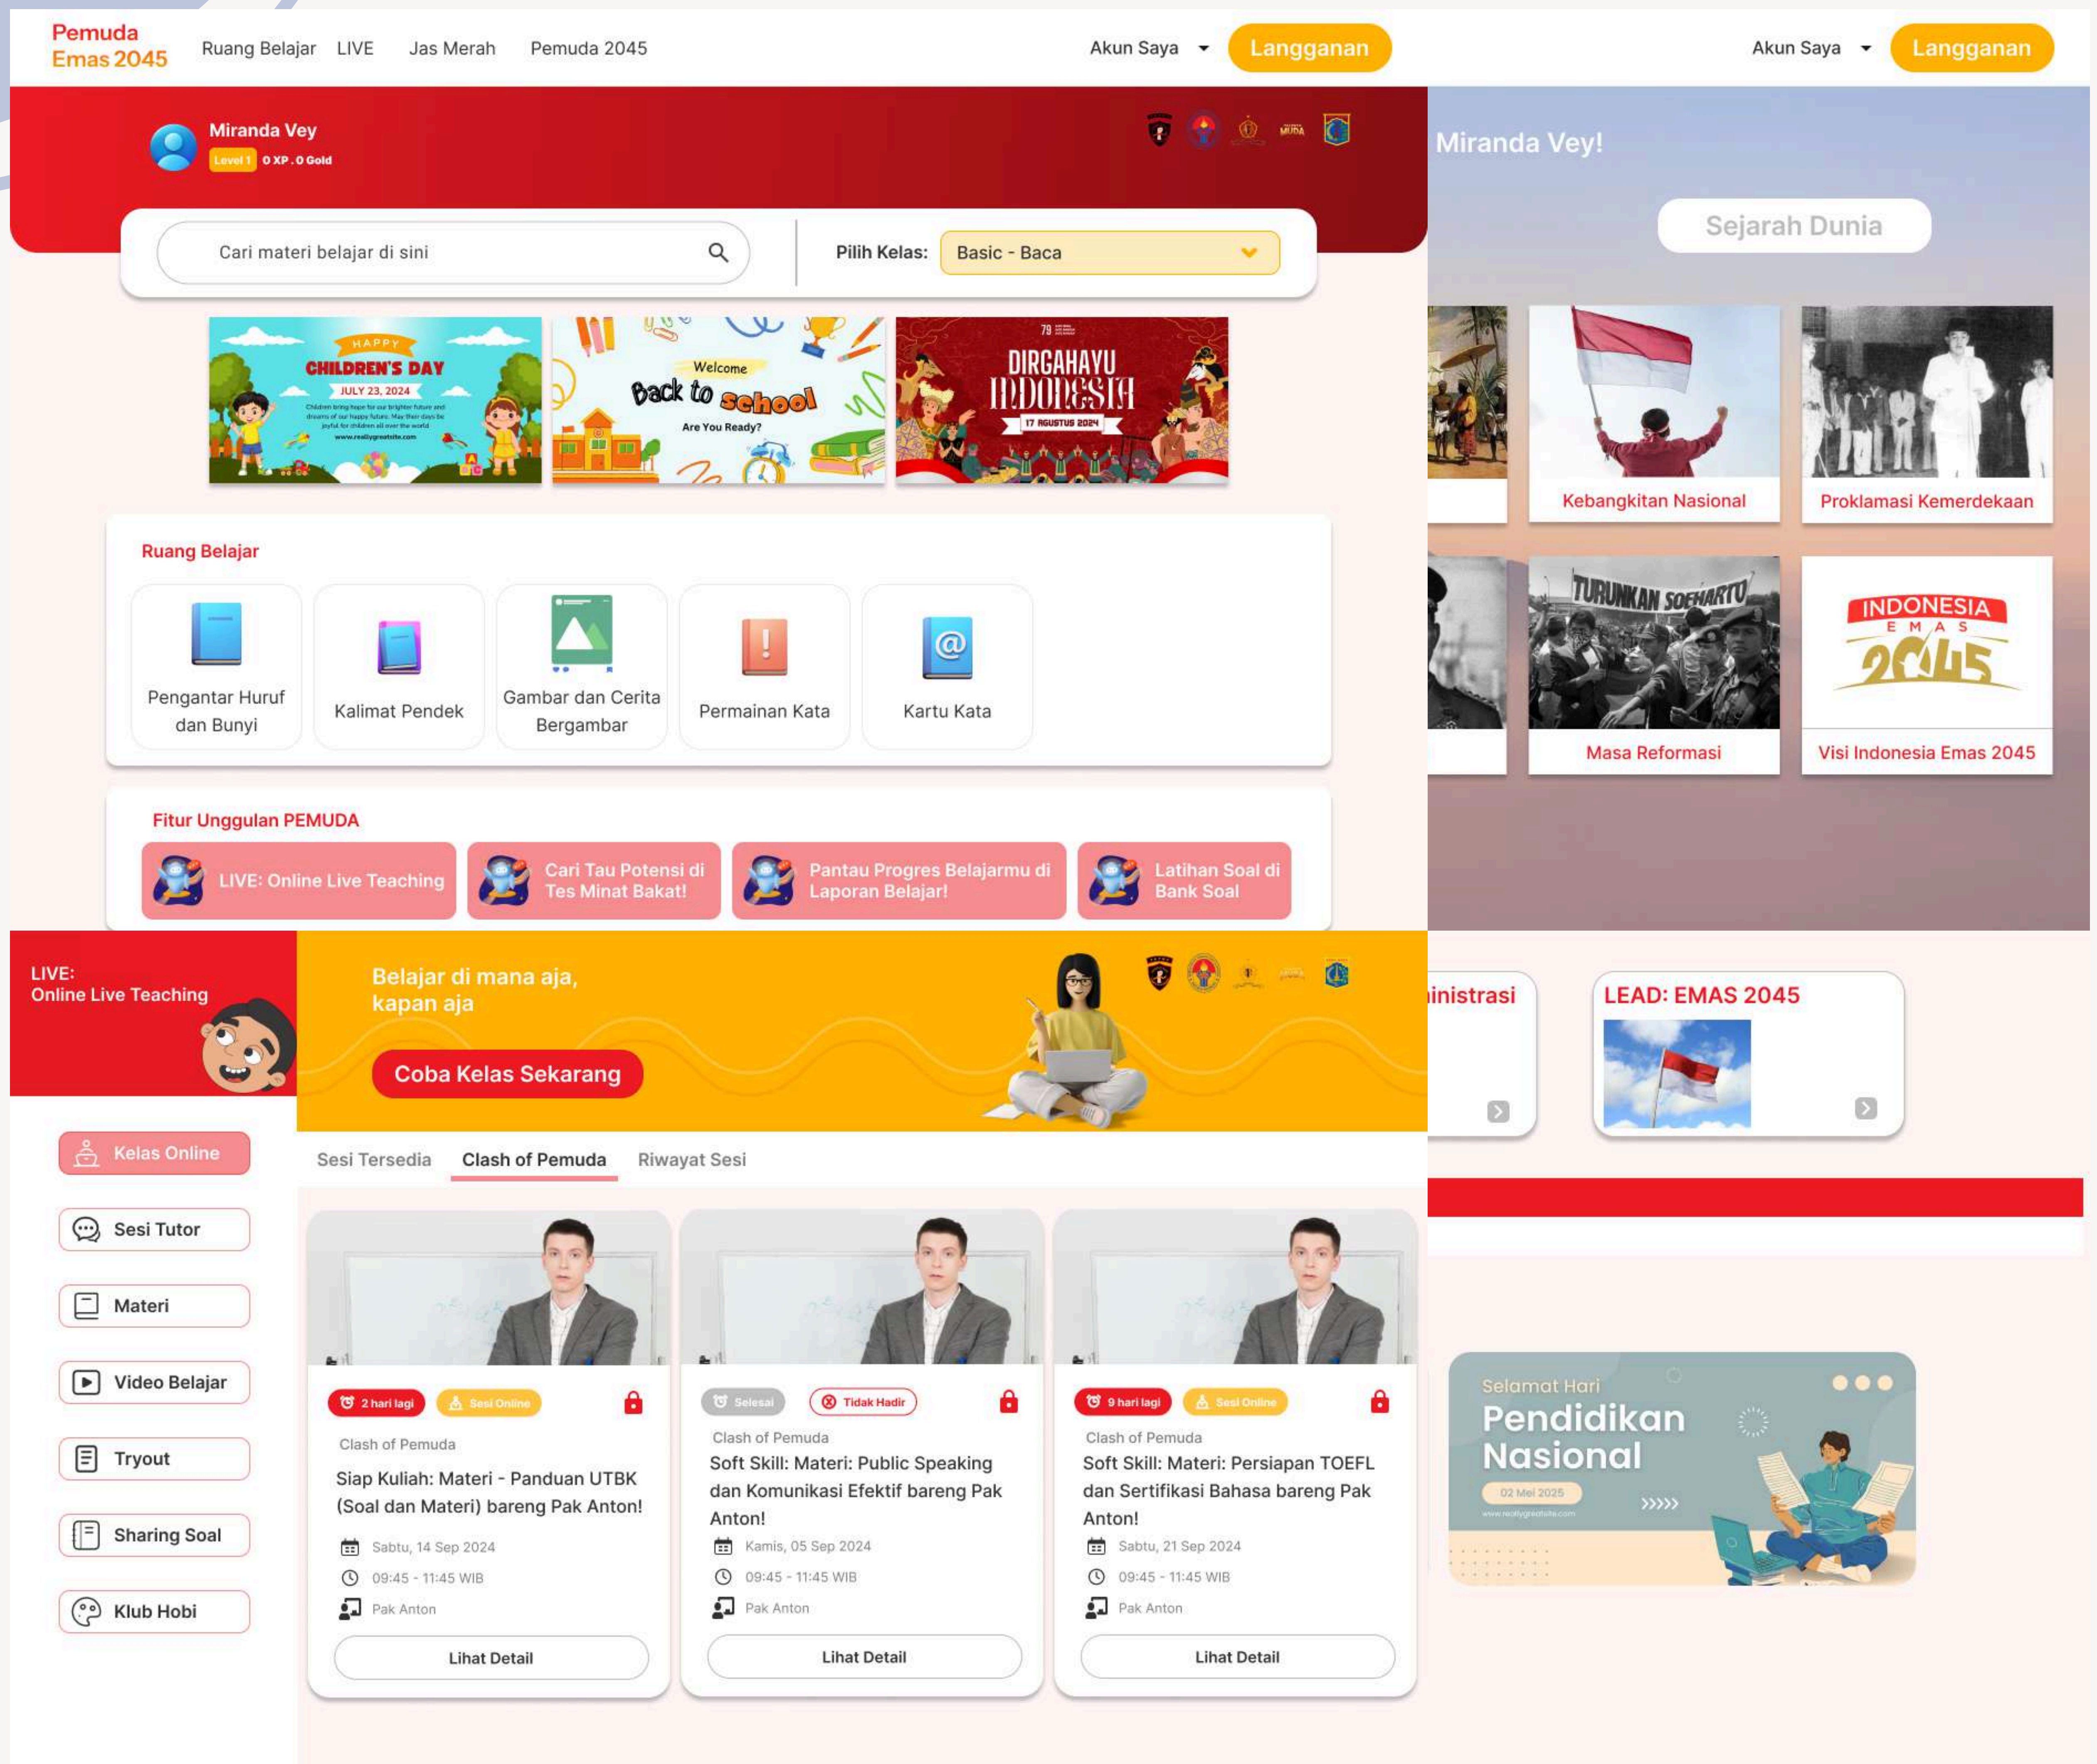

Designed for a hydroponics website, this layout offers streamlined farming tools, interactive guides, community engagement, and the latest in sustainable agriculture. Ensuring a seamless user experience for modern farmers.

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

PEMUDA WEB

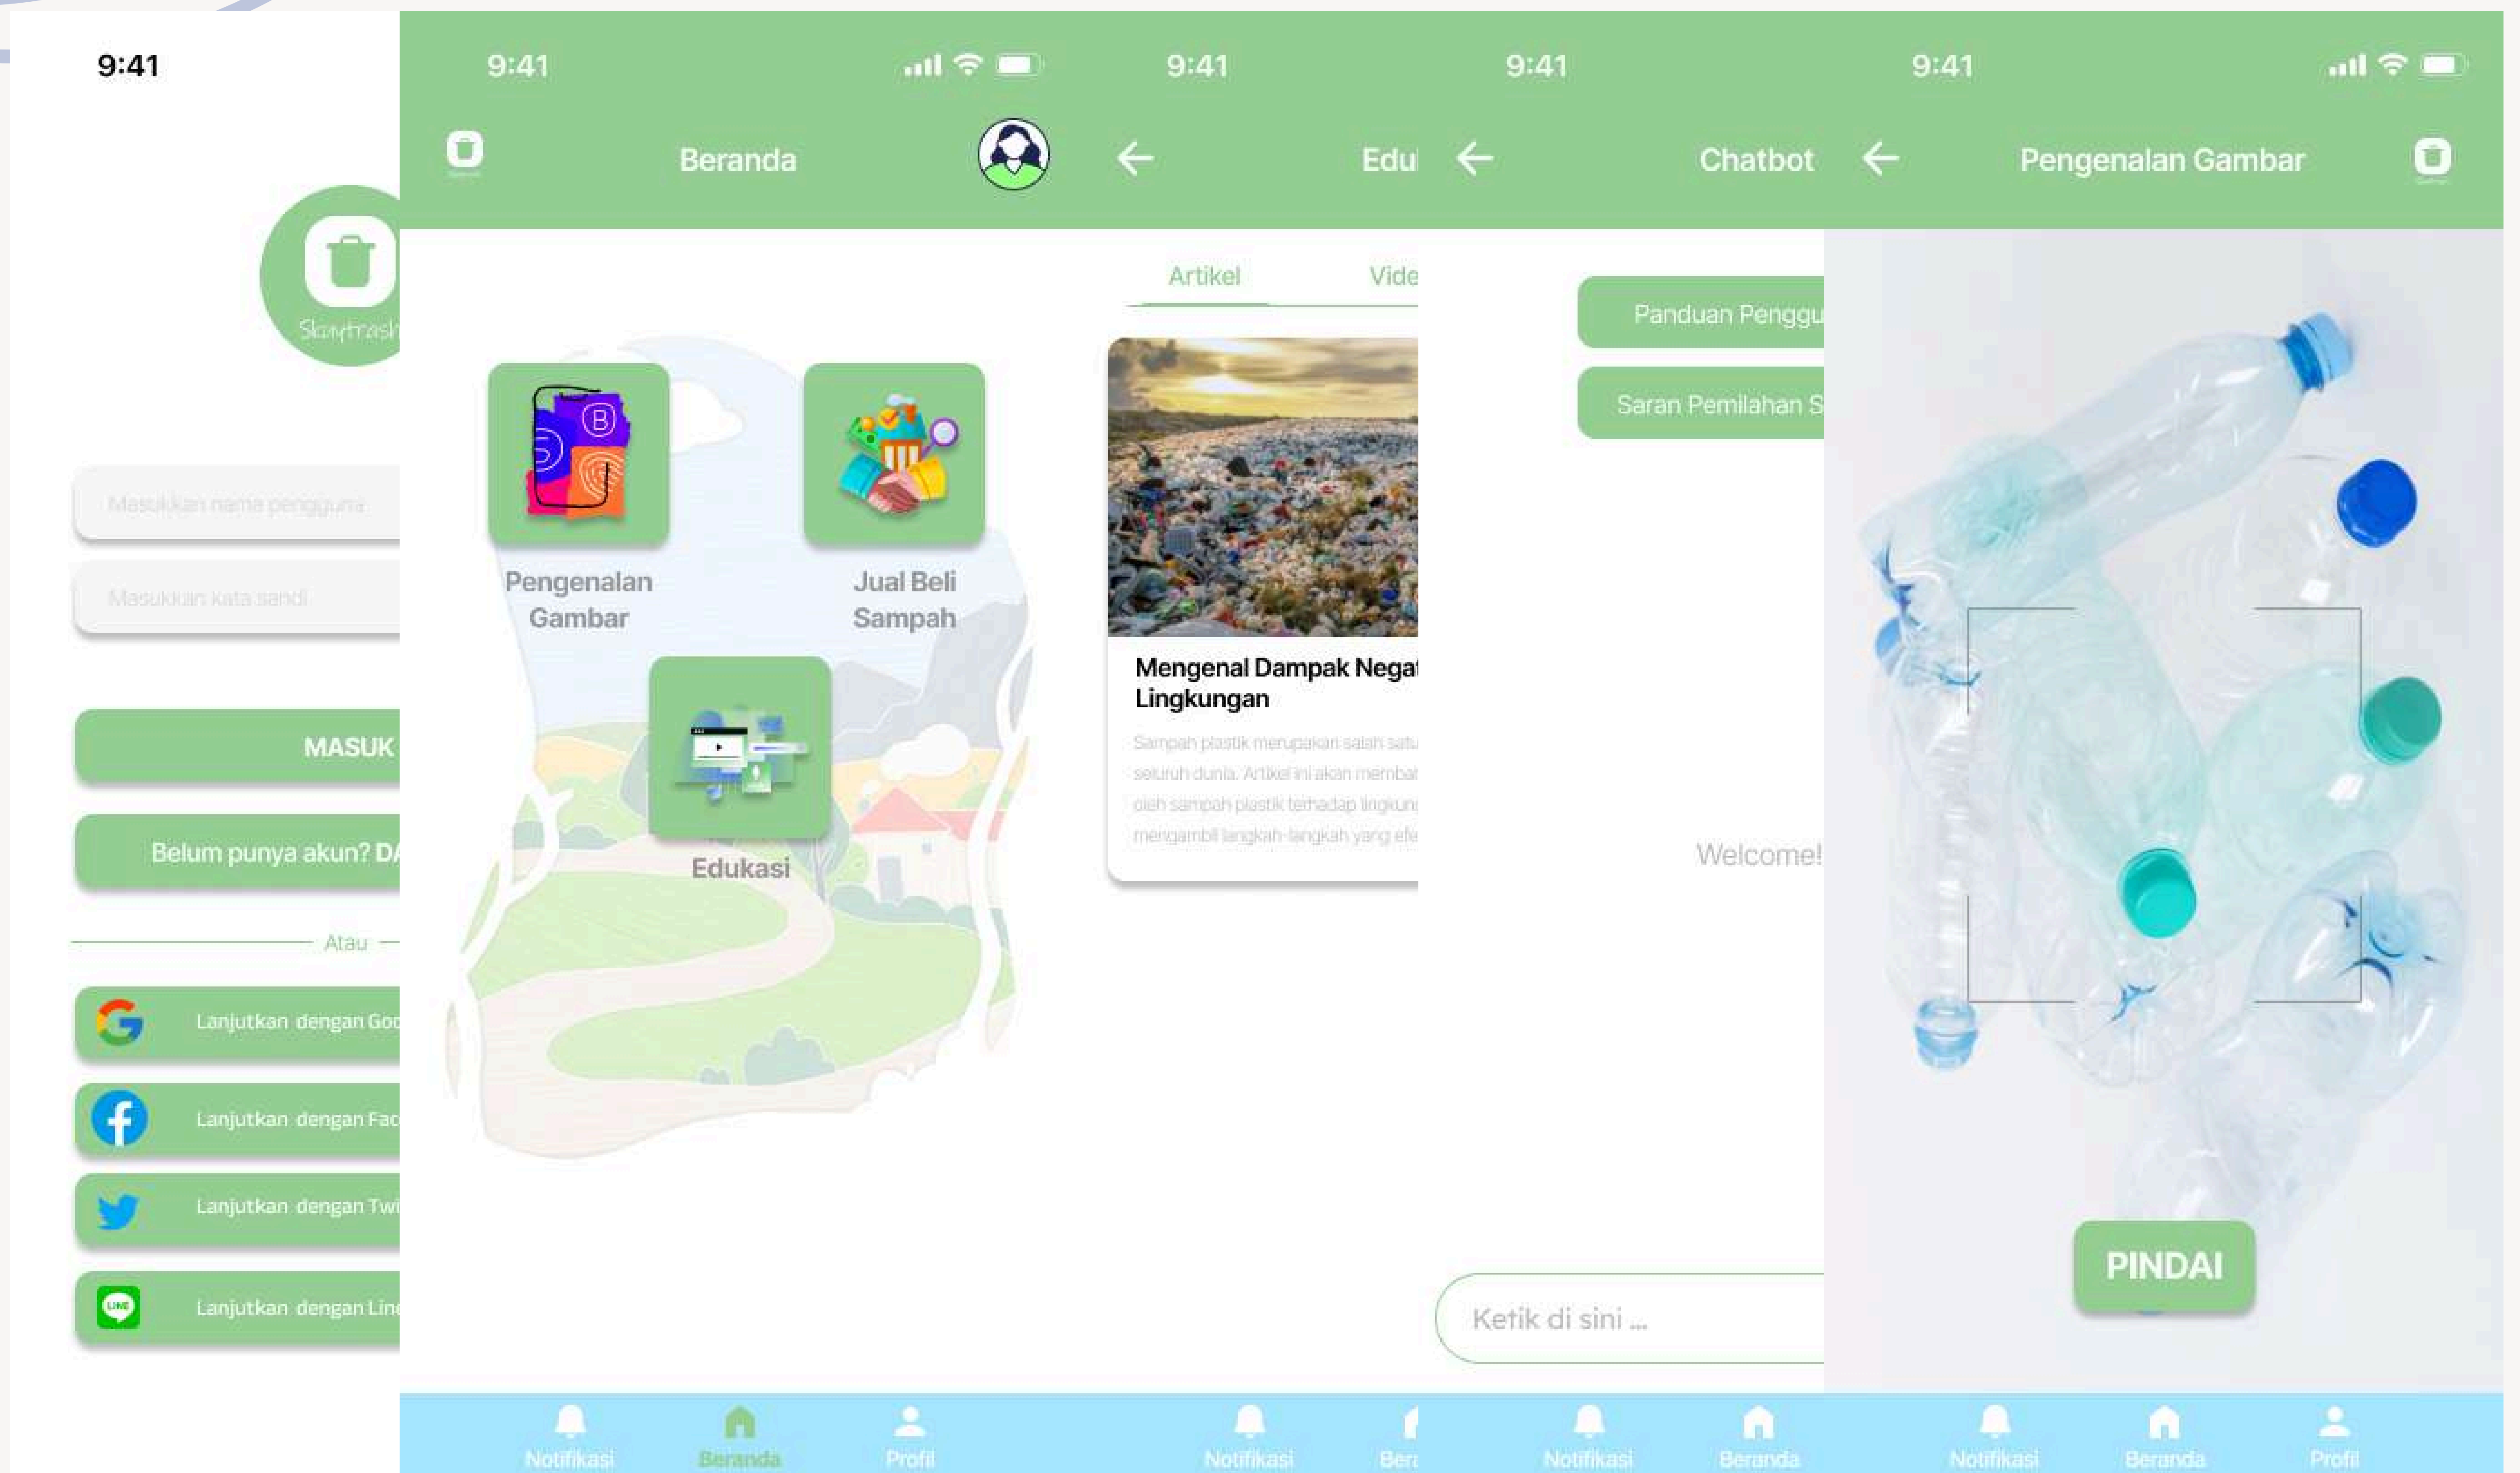

Pemuda Web is designed to inspire and educate young minds. Its vibrant, youth-friendly interface makes discovering information and accessing courses effortless and exciting. Engaging visuals, intuitive navigation, and interactive elements ensure a seamless experience tailored to the needs of today's generation. Explore, learn, and grow—all in one dynamic platform!

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

SKUYTRASH APP

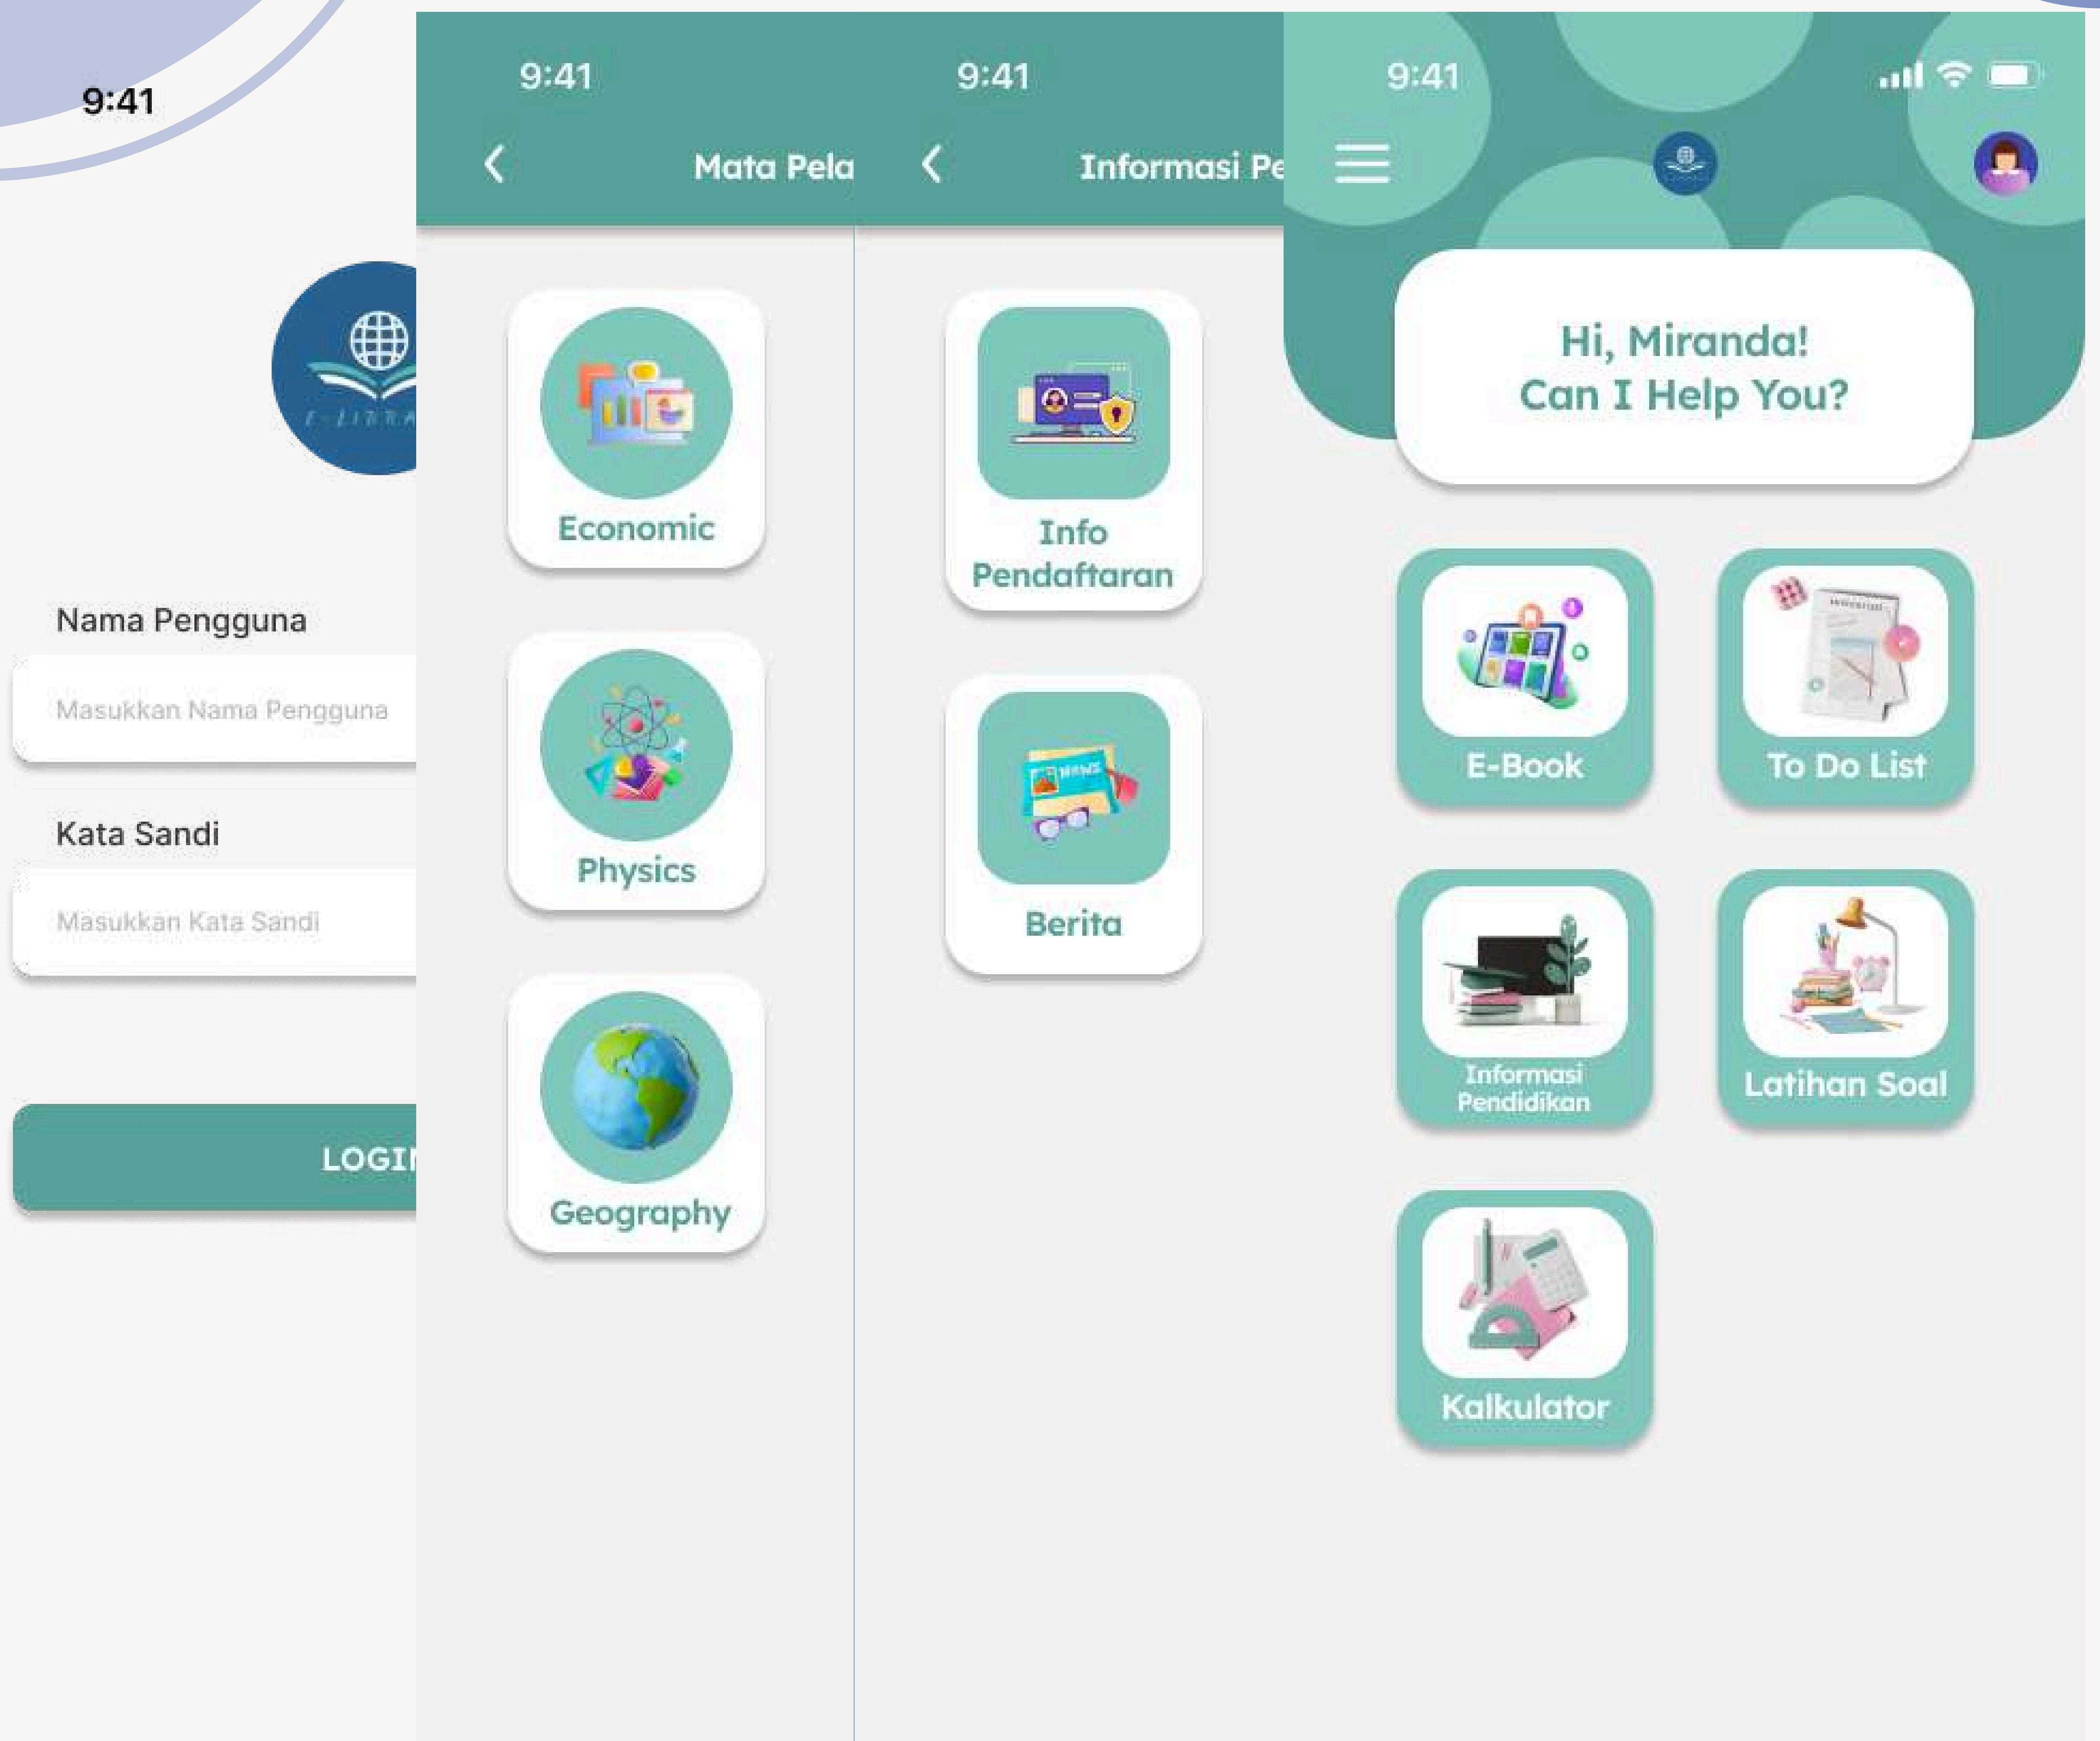

Designed to bring a more intelligent and seamless approach to managing waste. Whether you're looking to organize your trash collection, reduce waste, or stay informed about recycling programs, this app will be your trusted companion.

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

E-LIBRARY

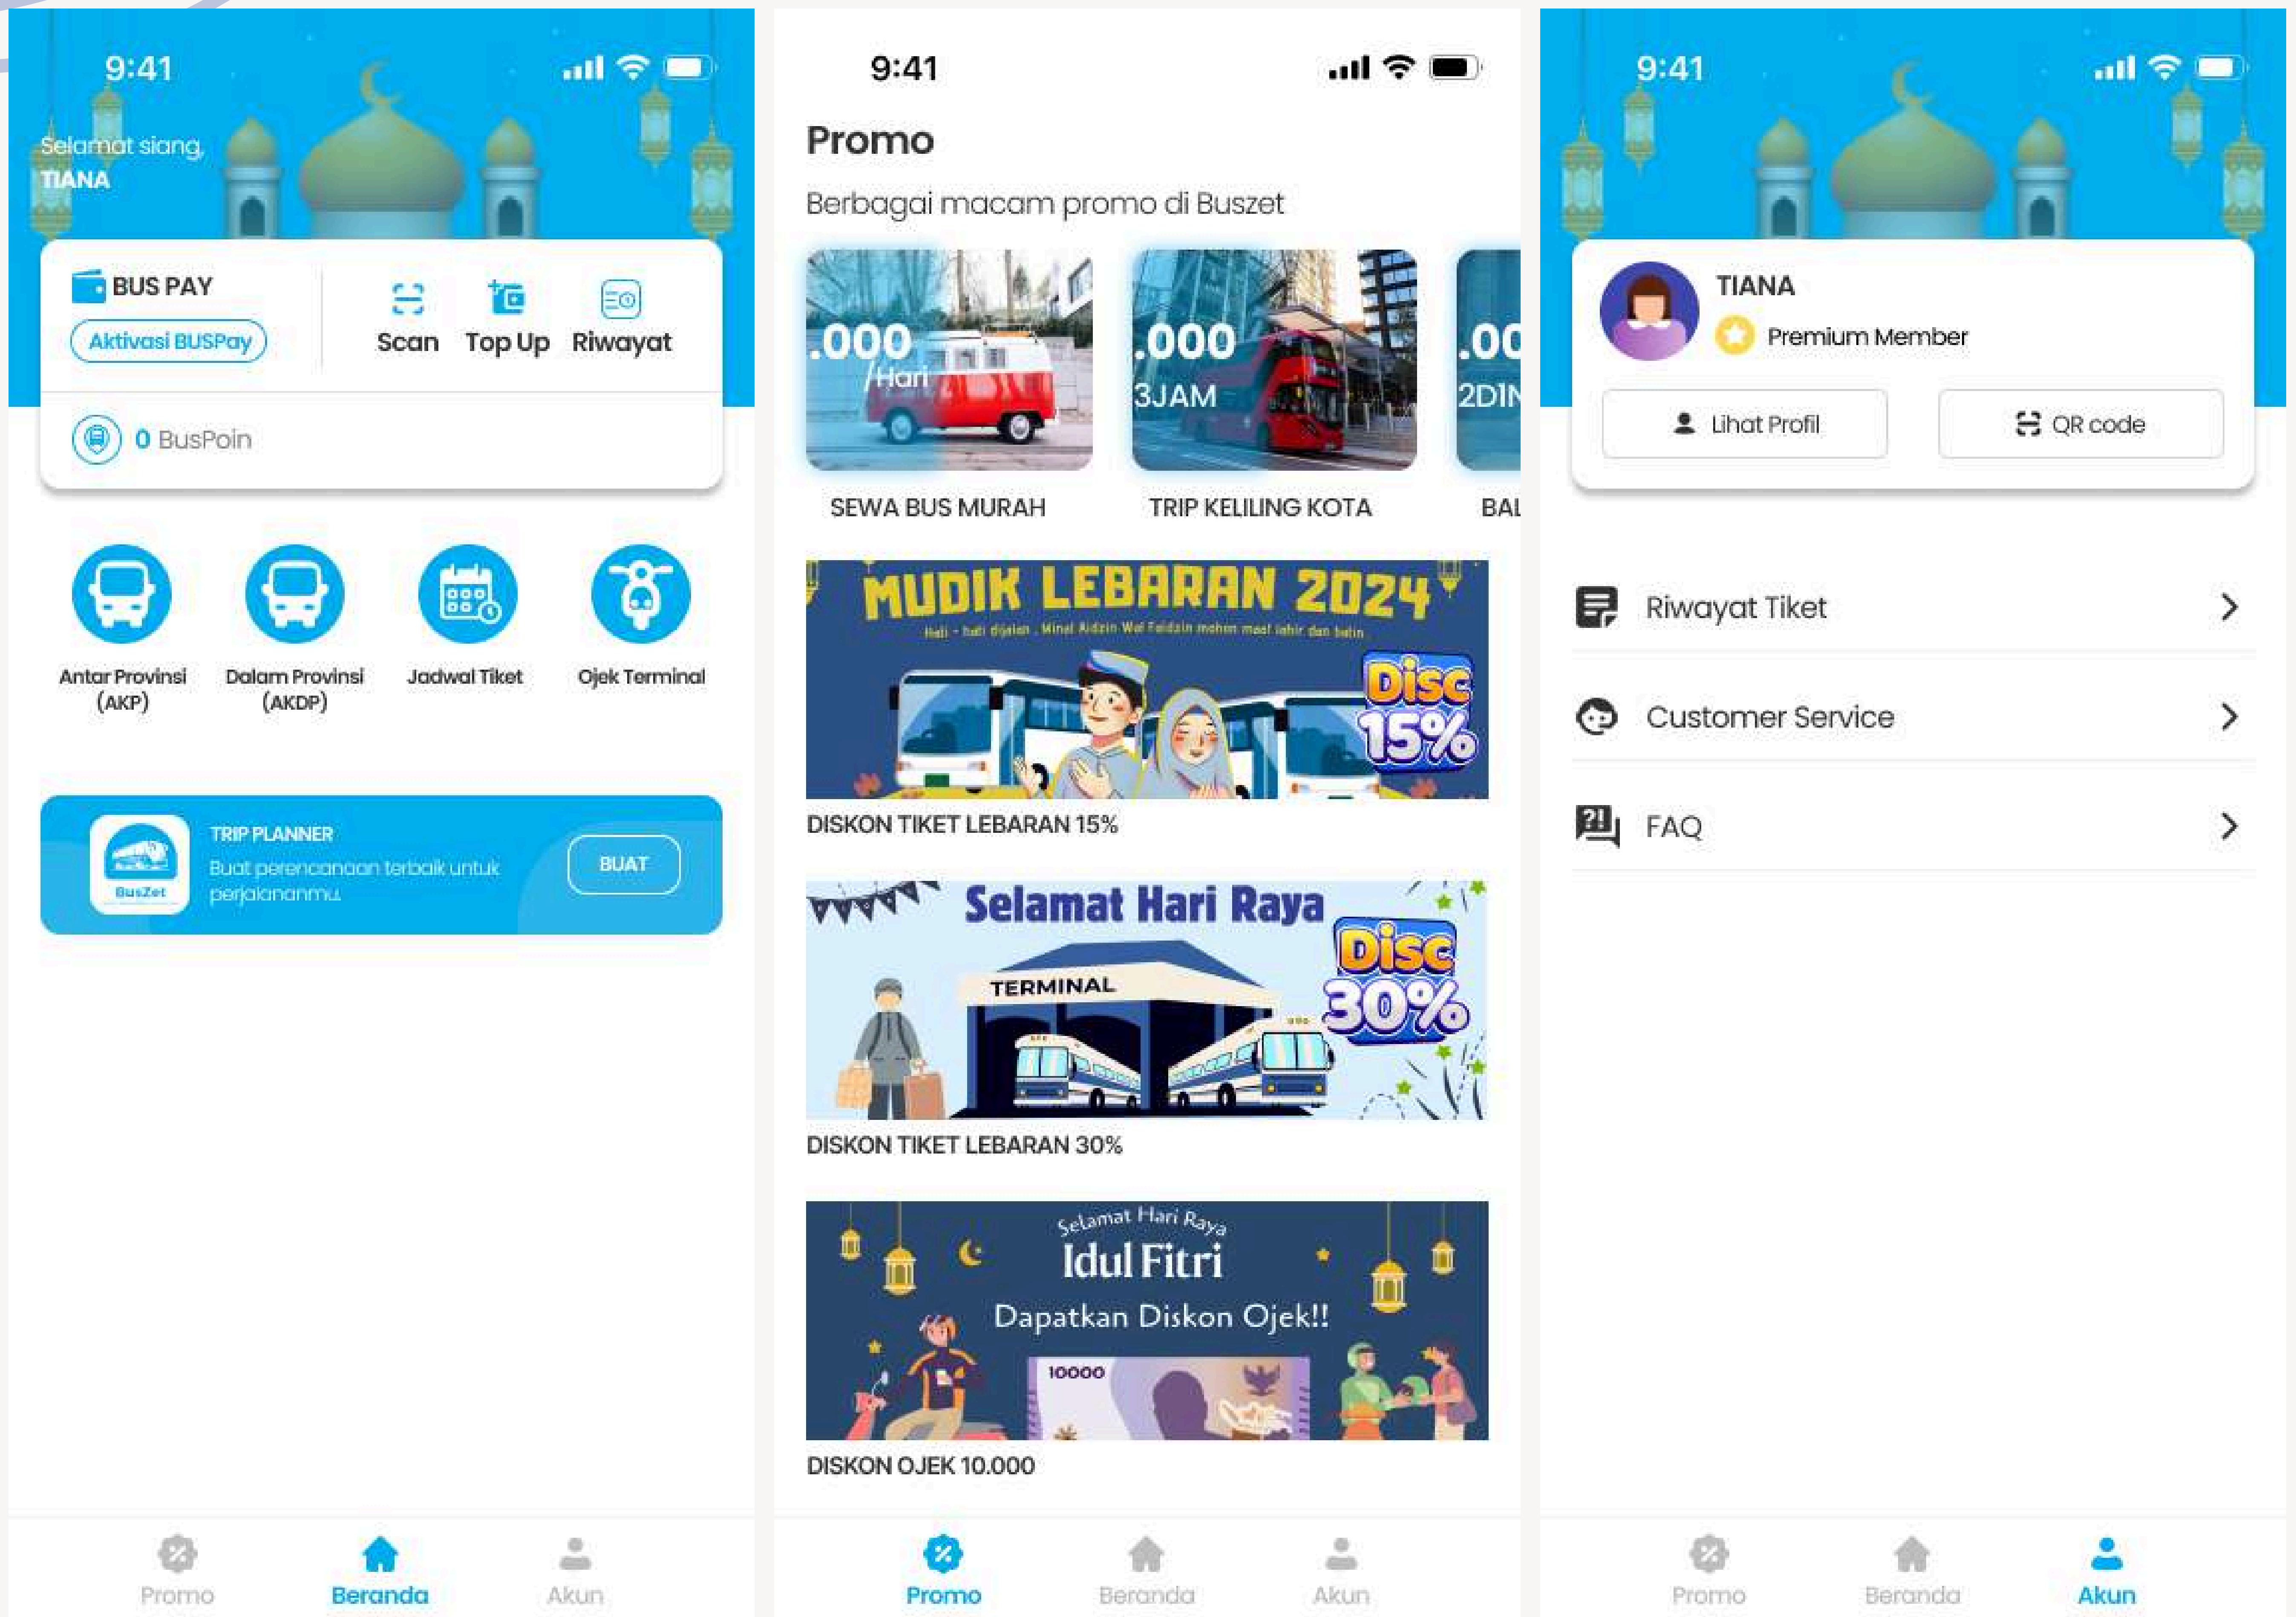

This app brings a world of e-books to your fingertips. With a sleek design and easy access, it makes reading and discovering new books effortless. Dive into your favorite stories or explore new ones—all just a tap away!

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

BUSZET APP

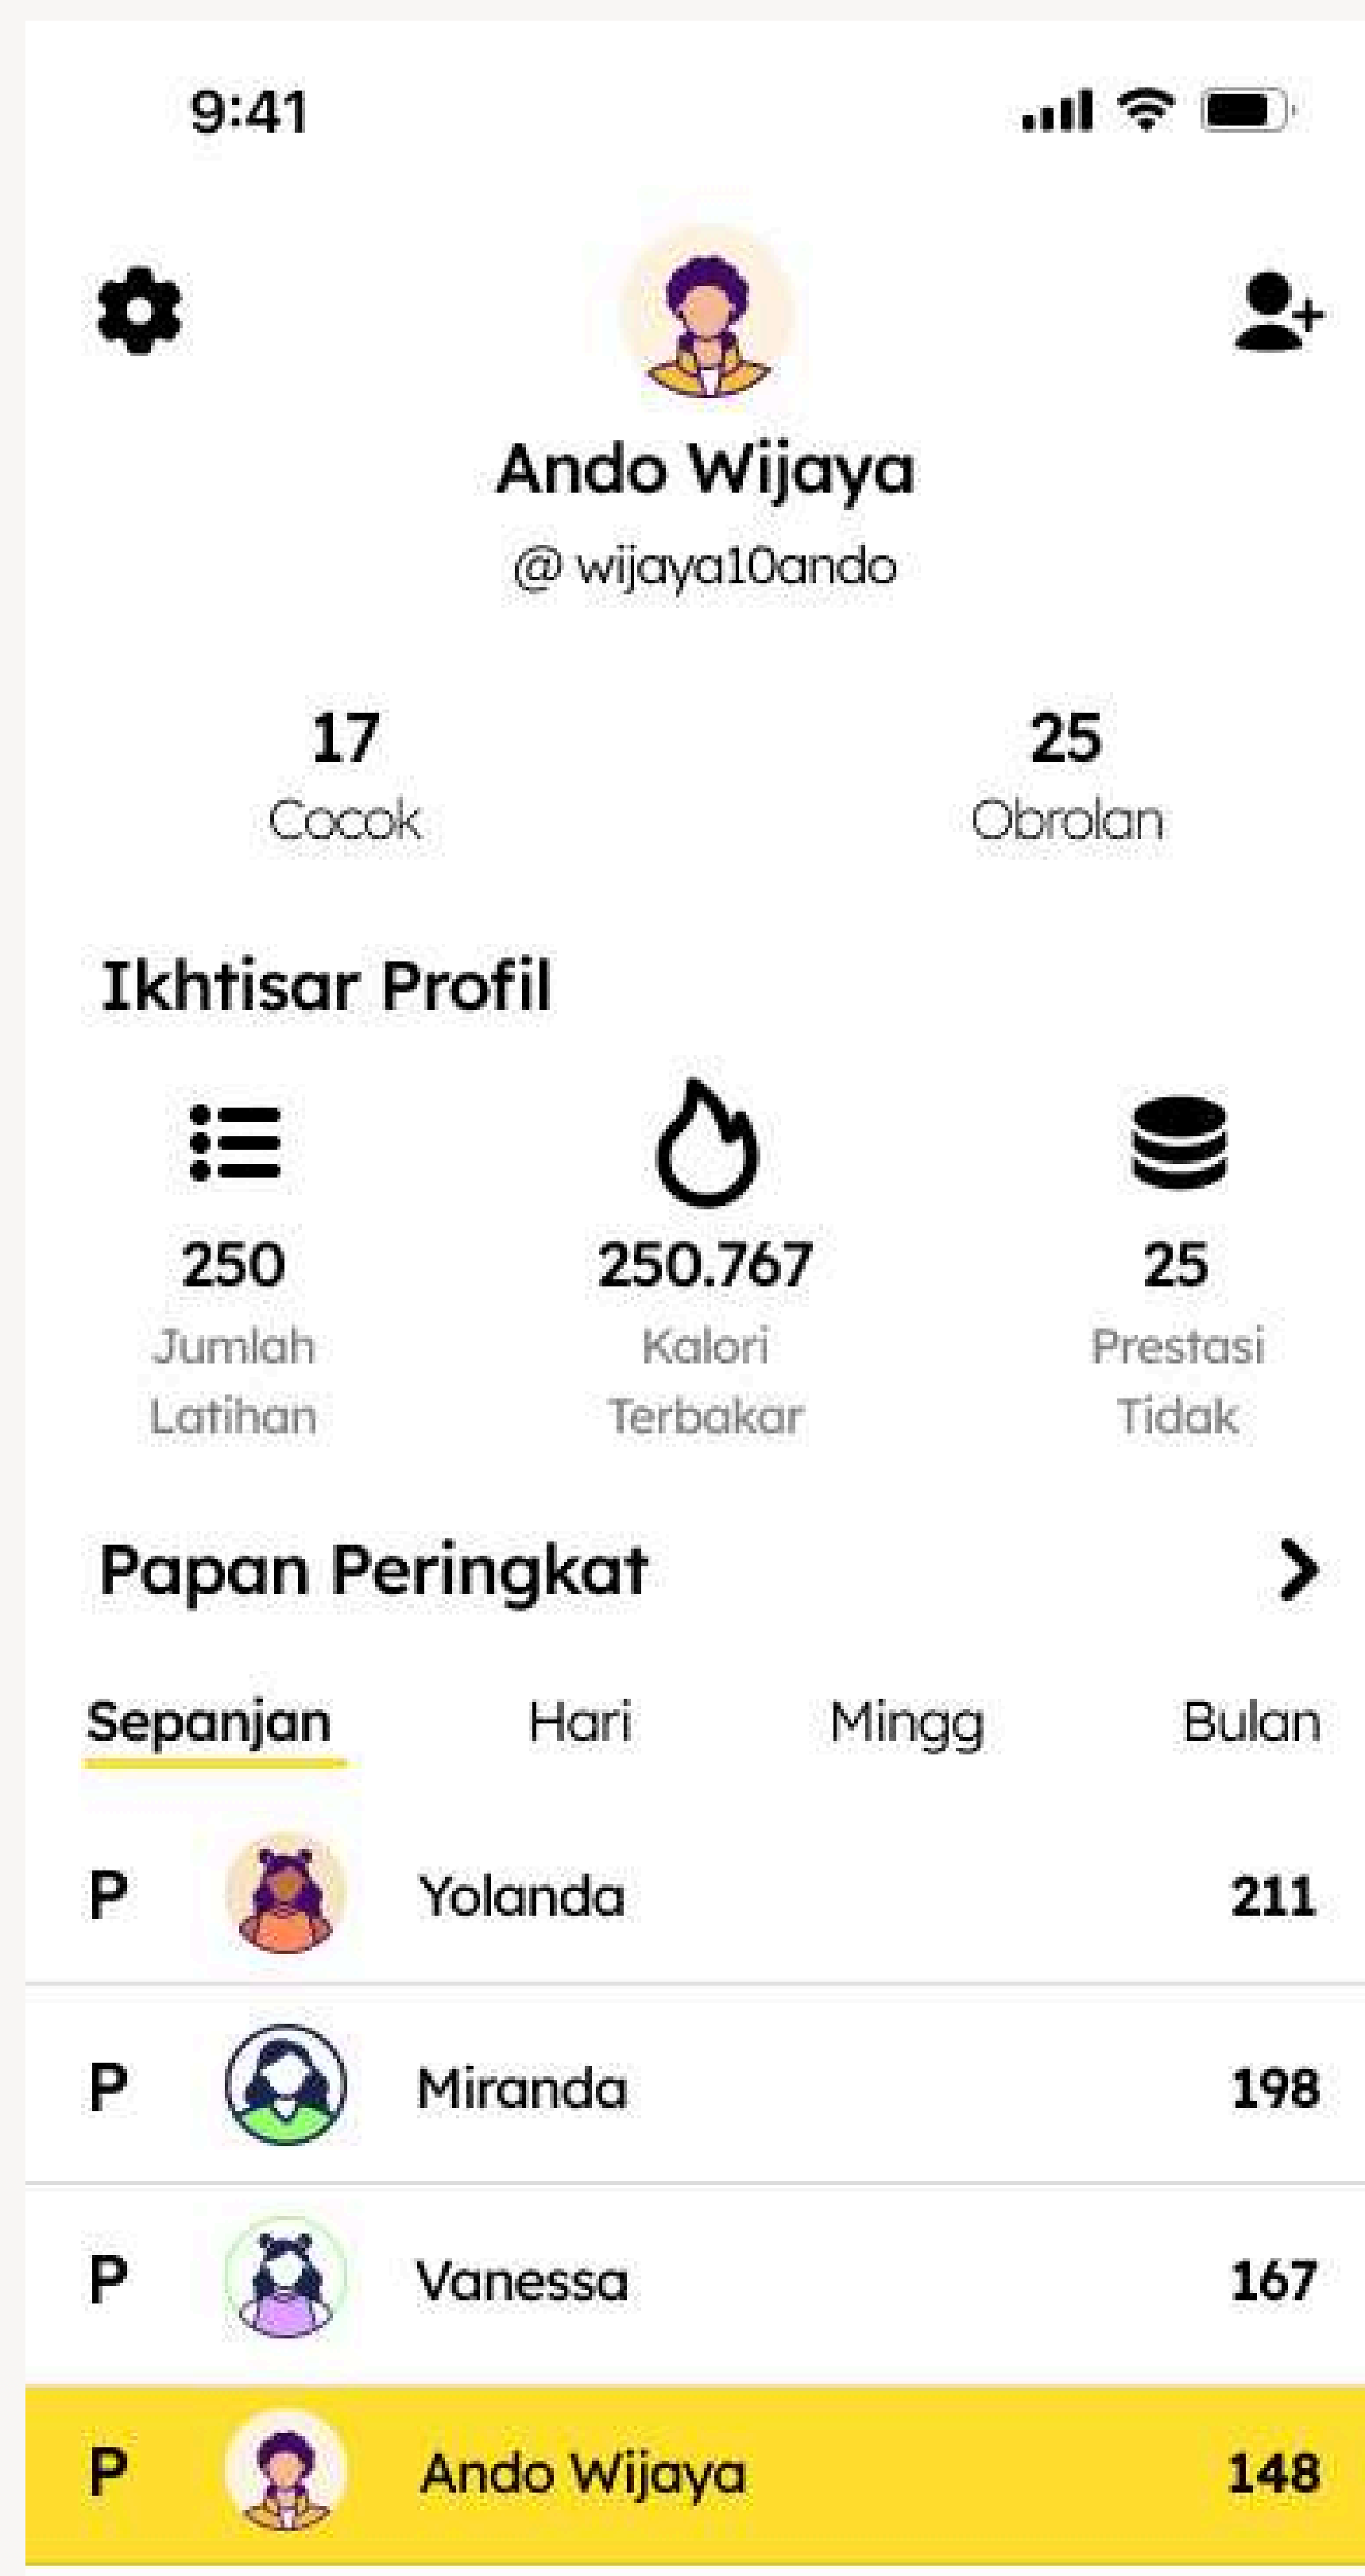

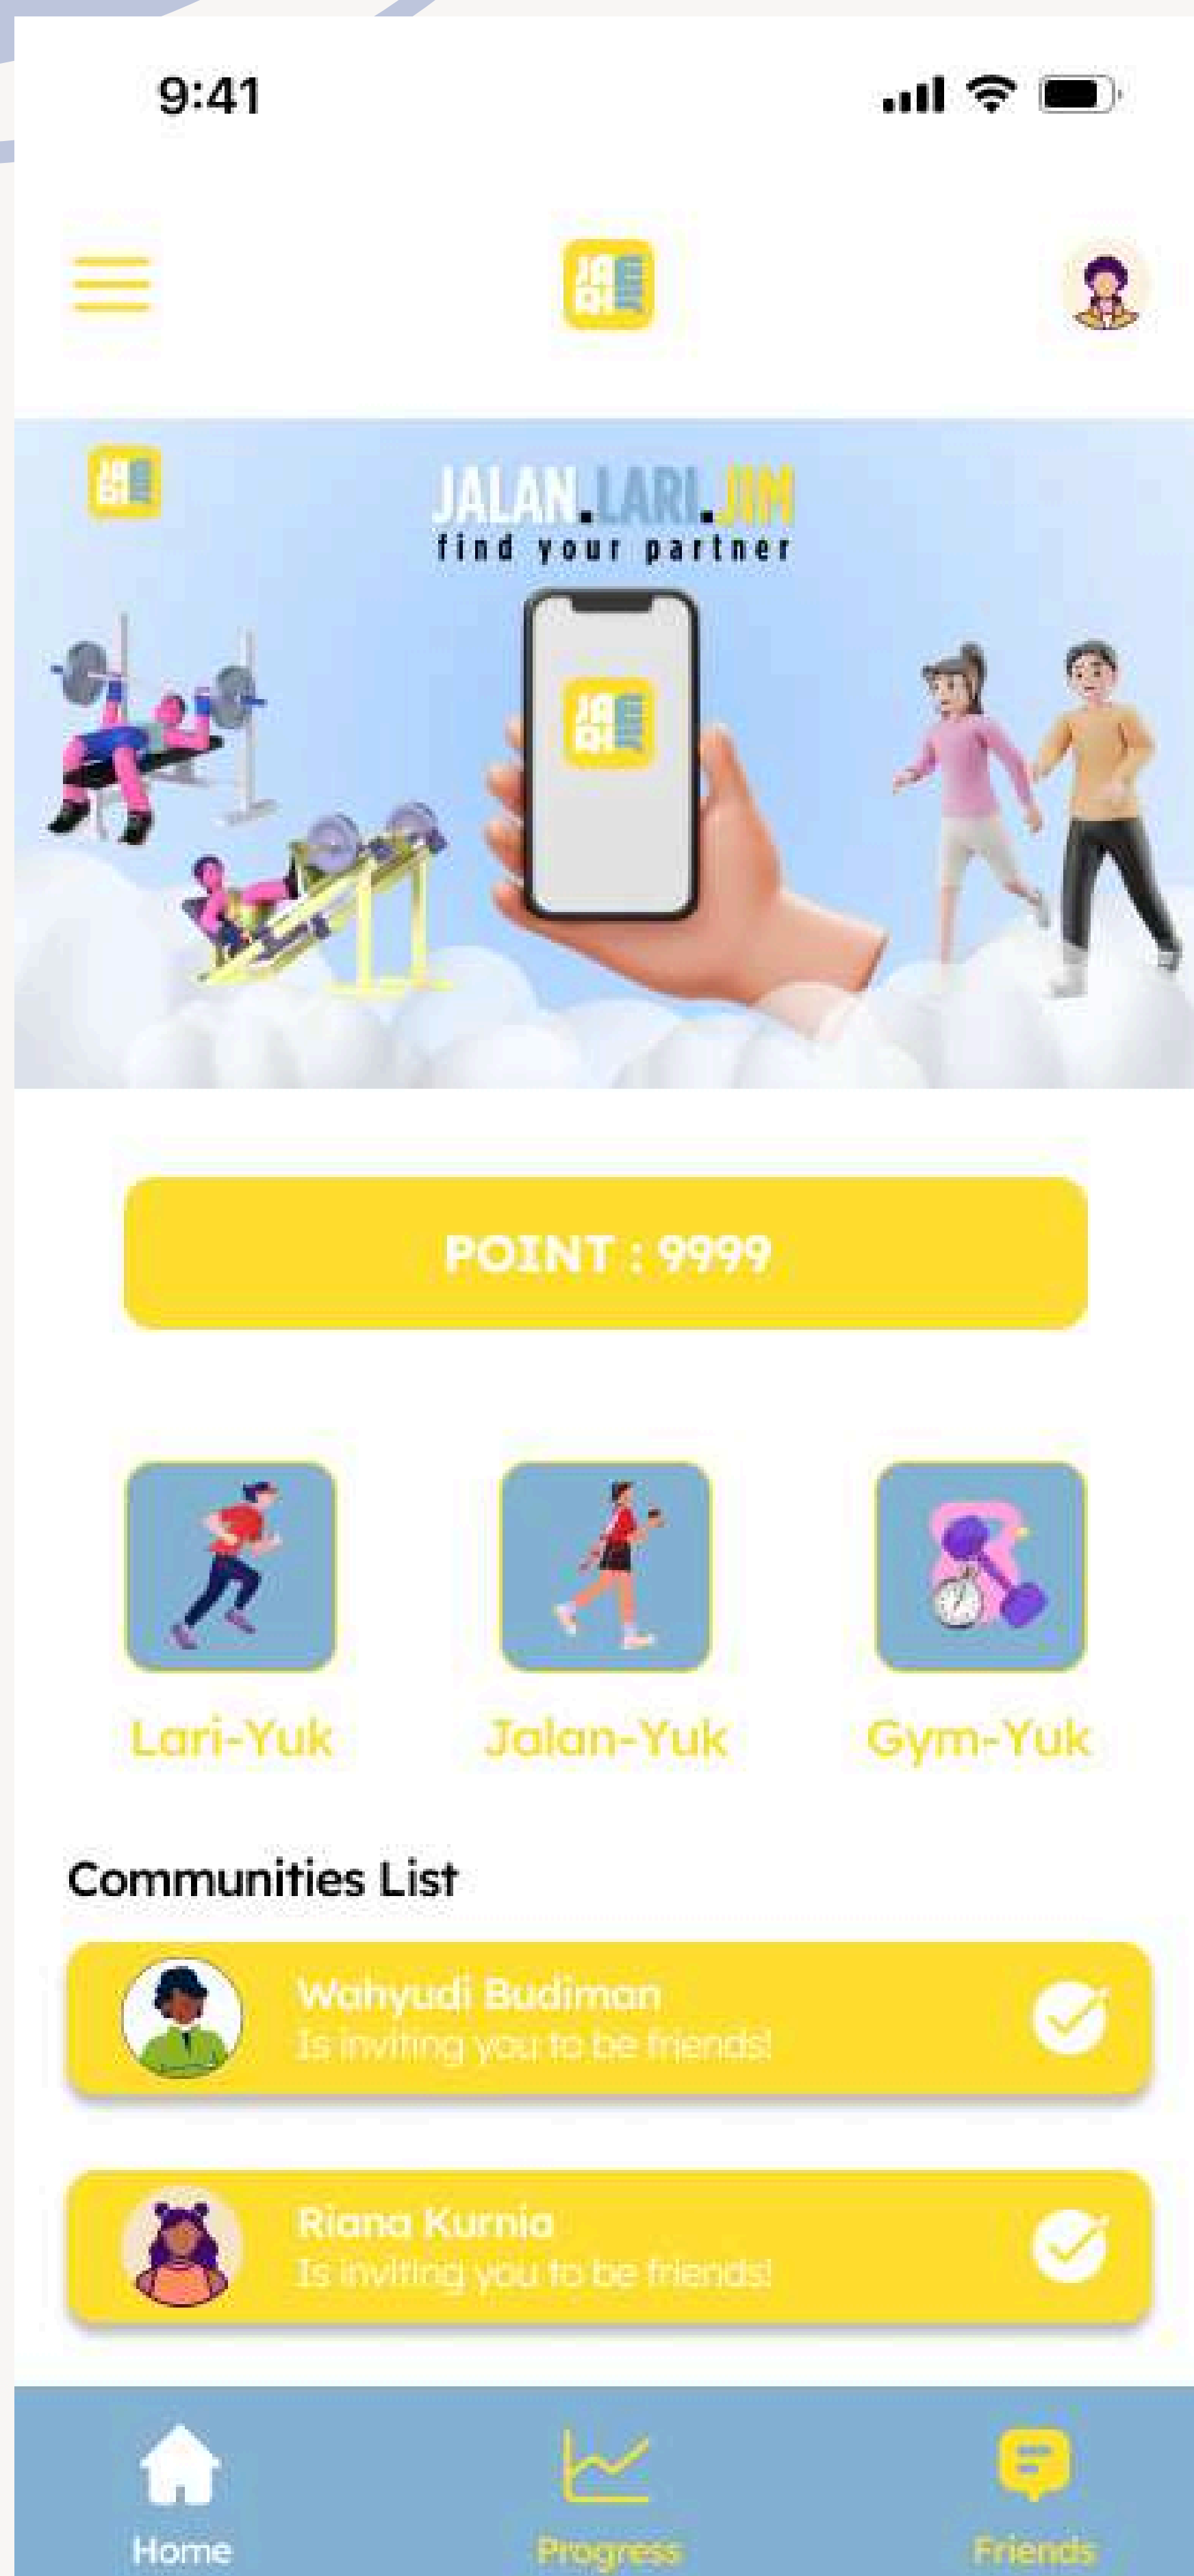

Buszet is a user-friendly transportation app designed to make your travel experience seamless, efficient, and personalized. This app ensures that you can always find the best and most convenient ride.

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

JARIJIM APP

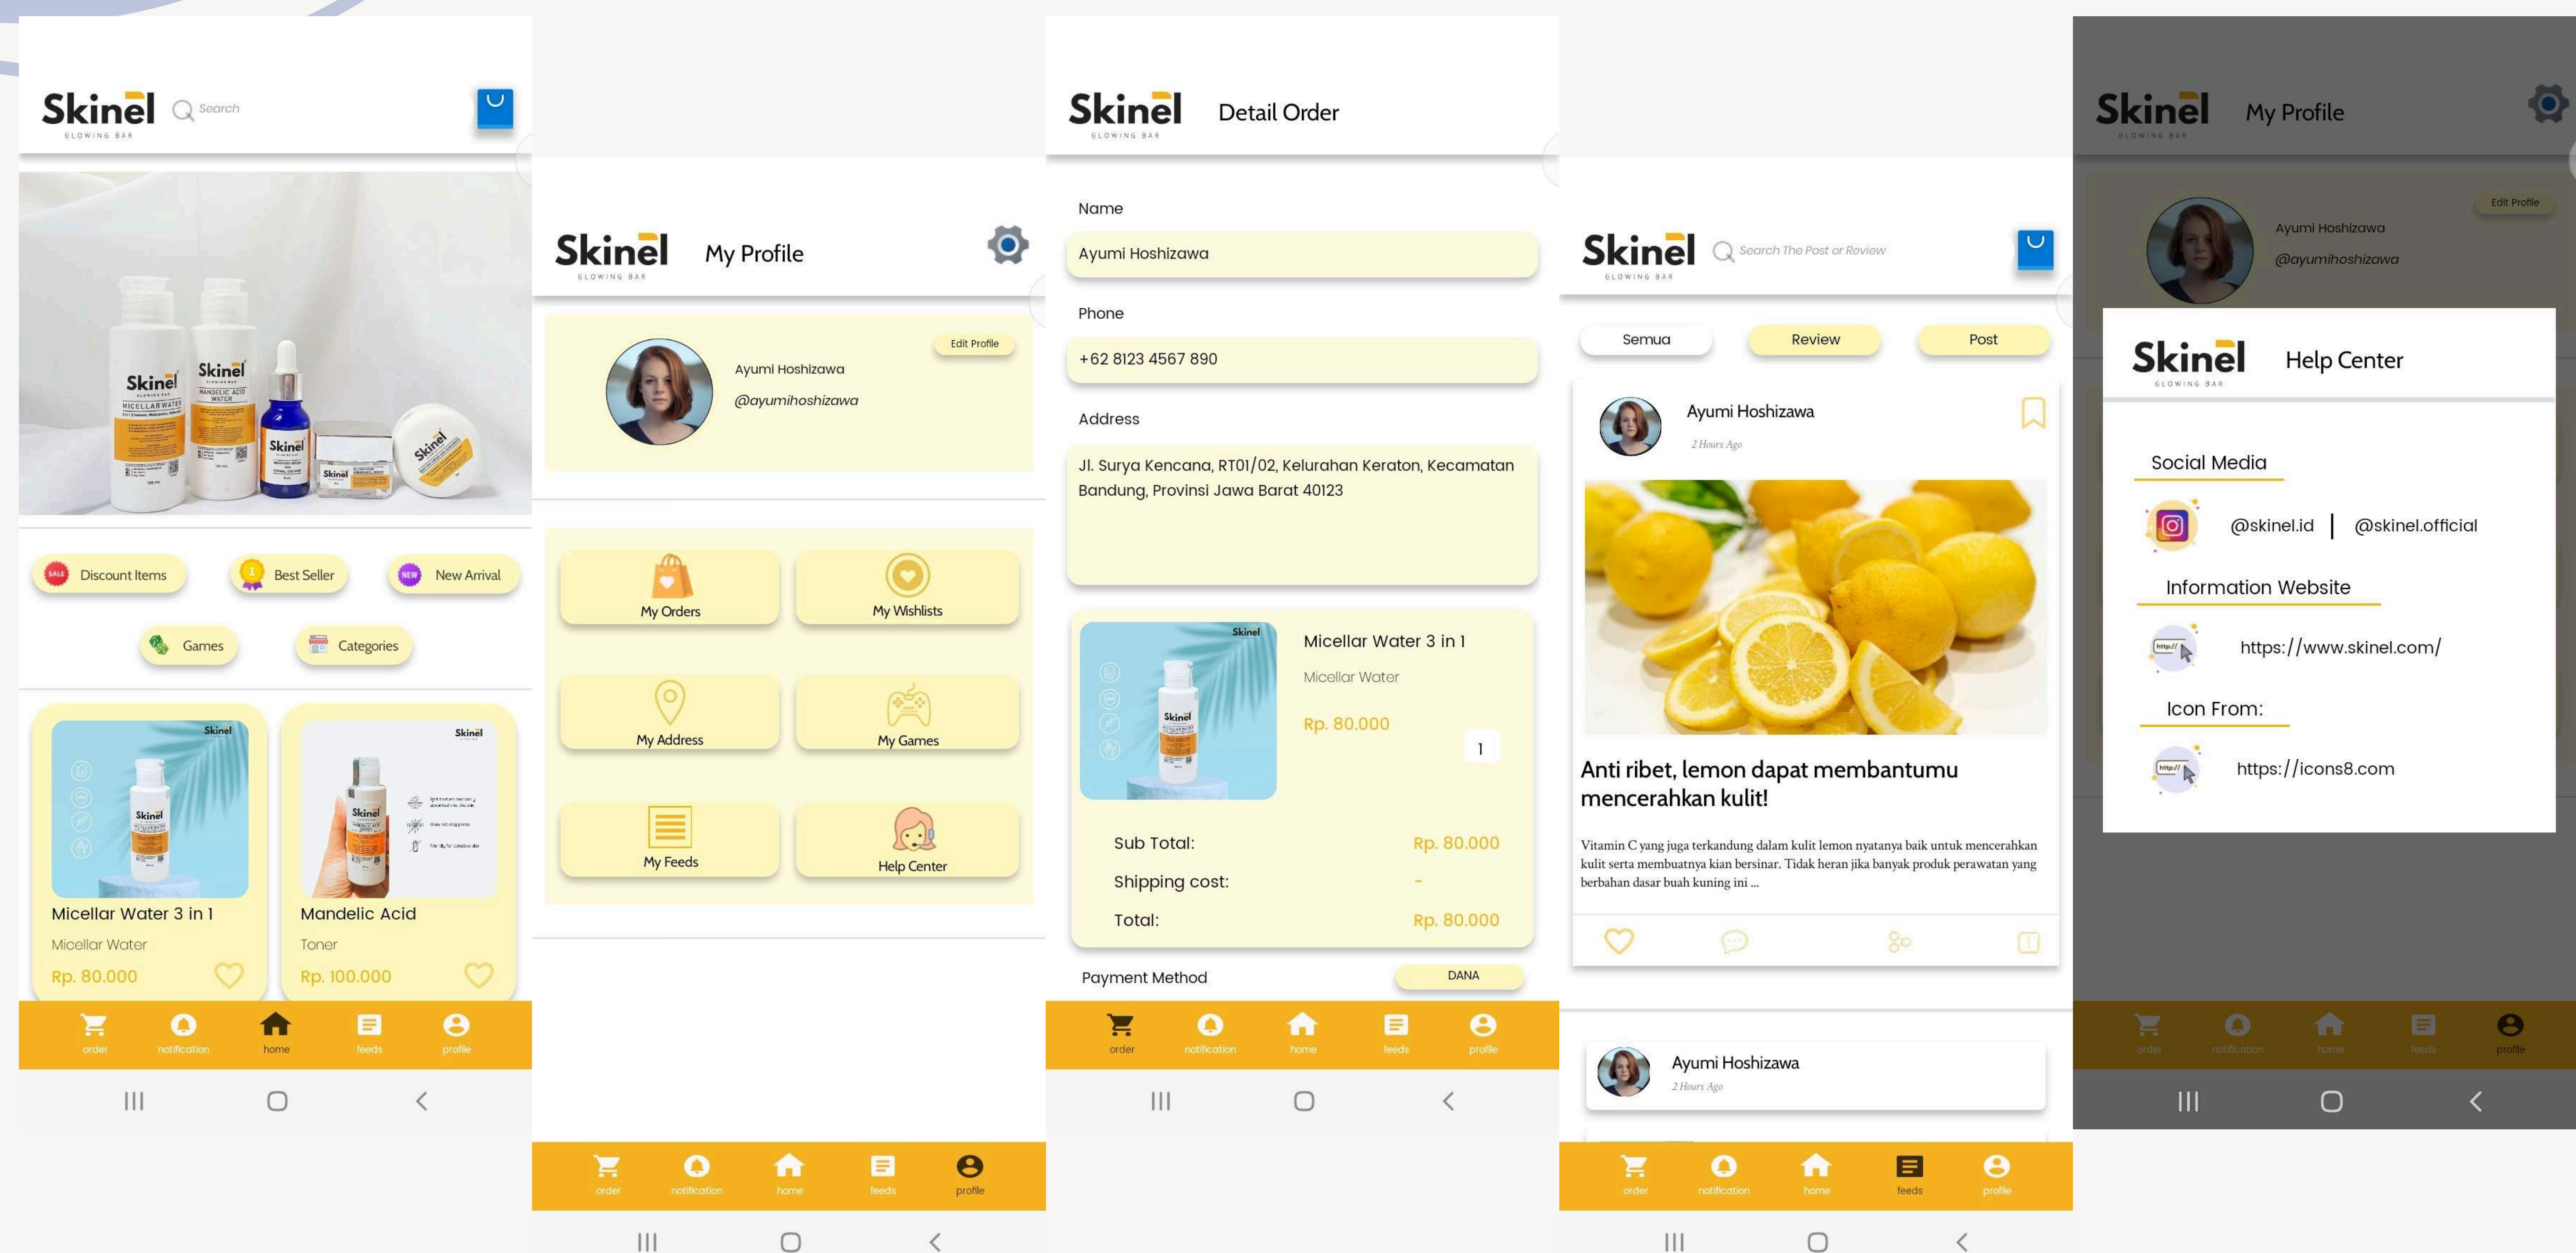

Ultimate app for sports enthusiasts and active singles alike. From solo workouts to group activities, SportSync connects people through shared passion for sports and fitness, while giving you the chance to meet new friends or potential partners along the way.

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes.

SKINEL'S APP

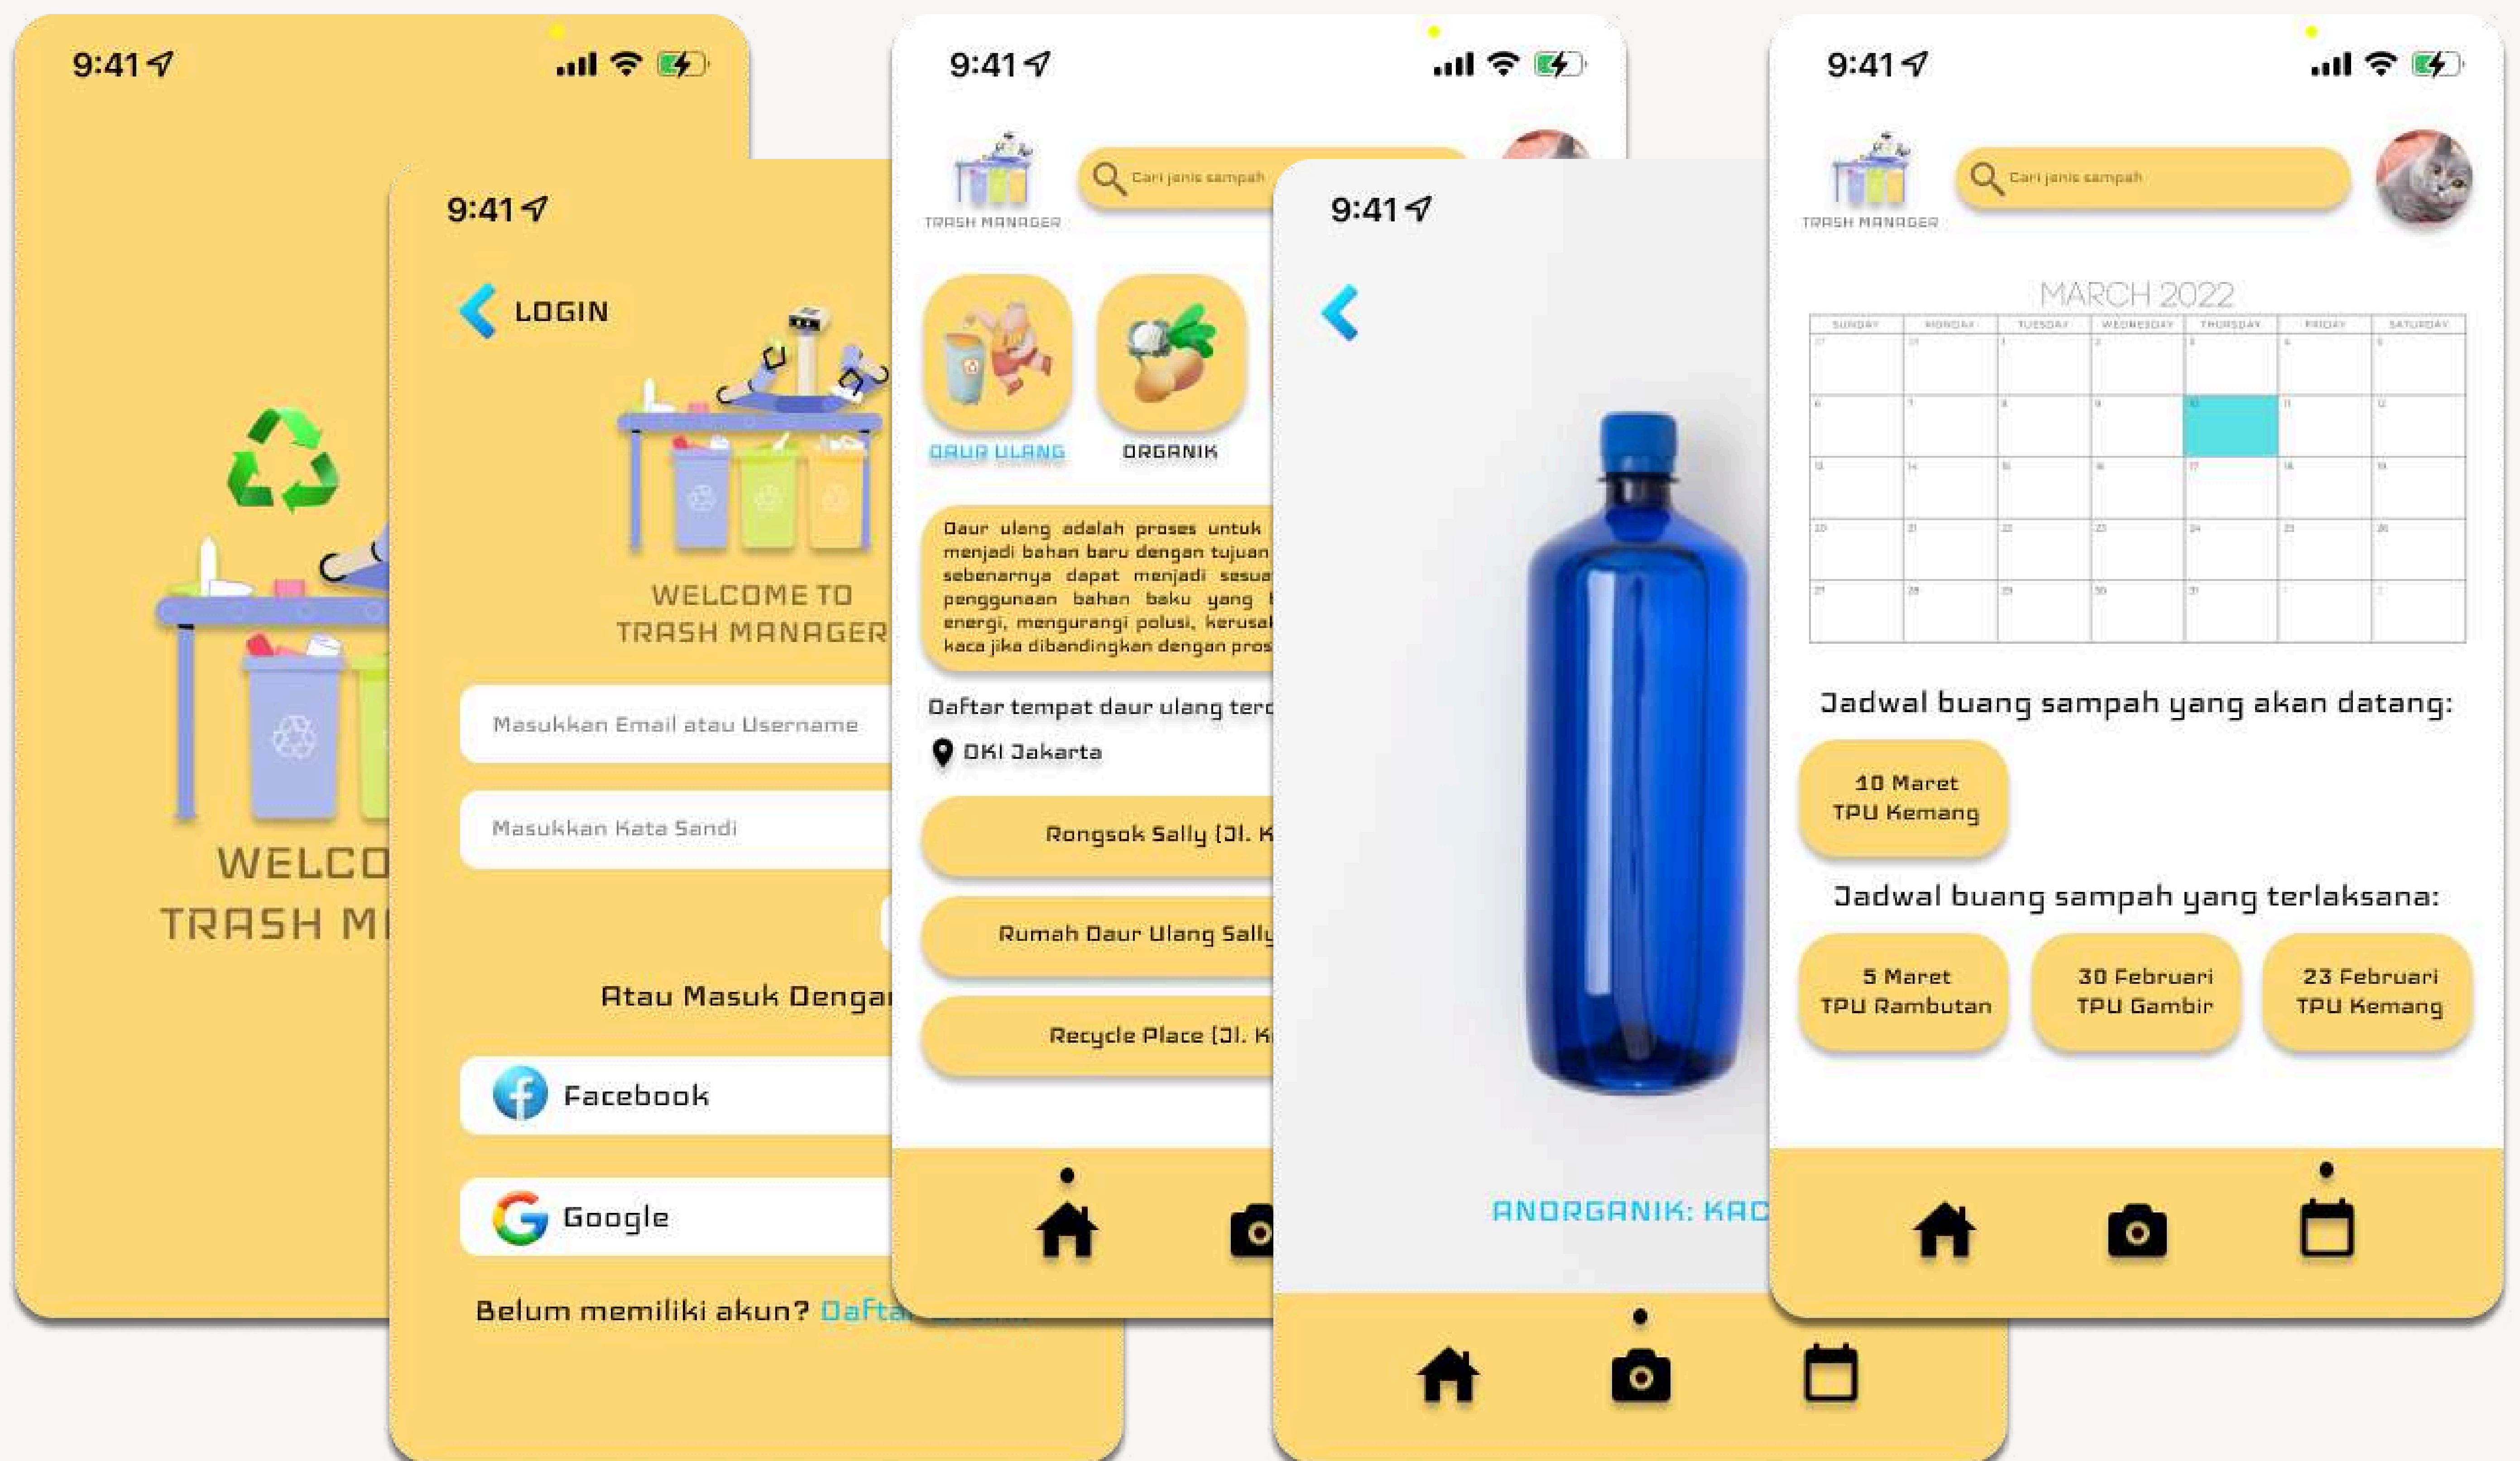

These are some of the feature designs of the app.
Home, Profile, Detail Order, etc.

My undergraduate thesis project is a mobile application for online shopping, specifically designed for women looking for customizable skincare products suitable for Asian skin types.

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

TRASH MANAGER APP

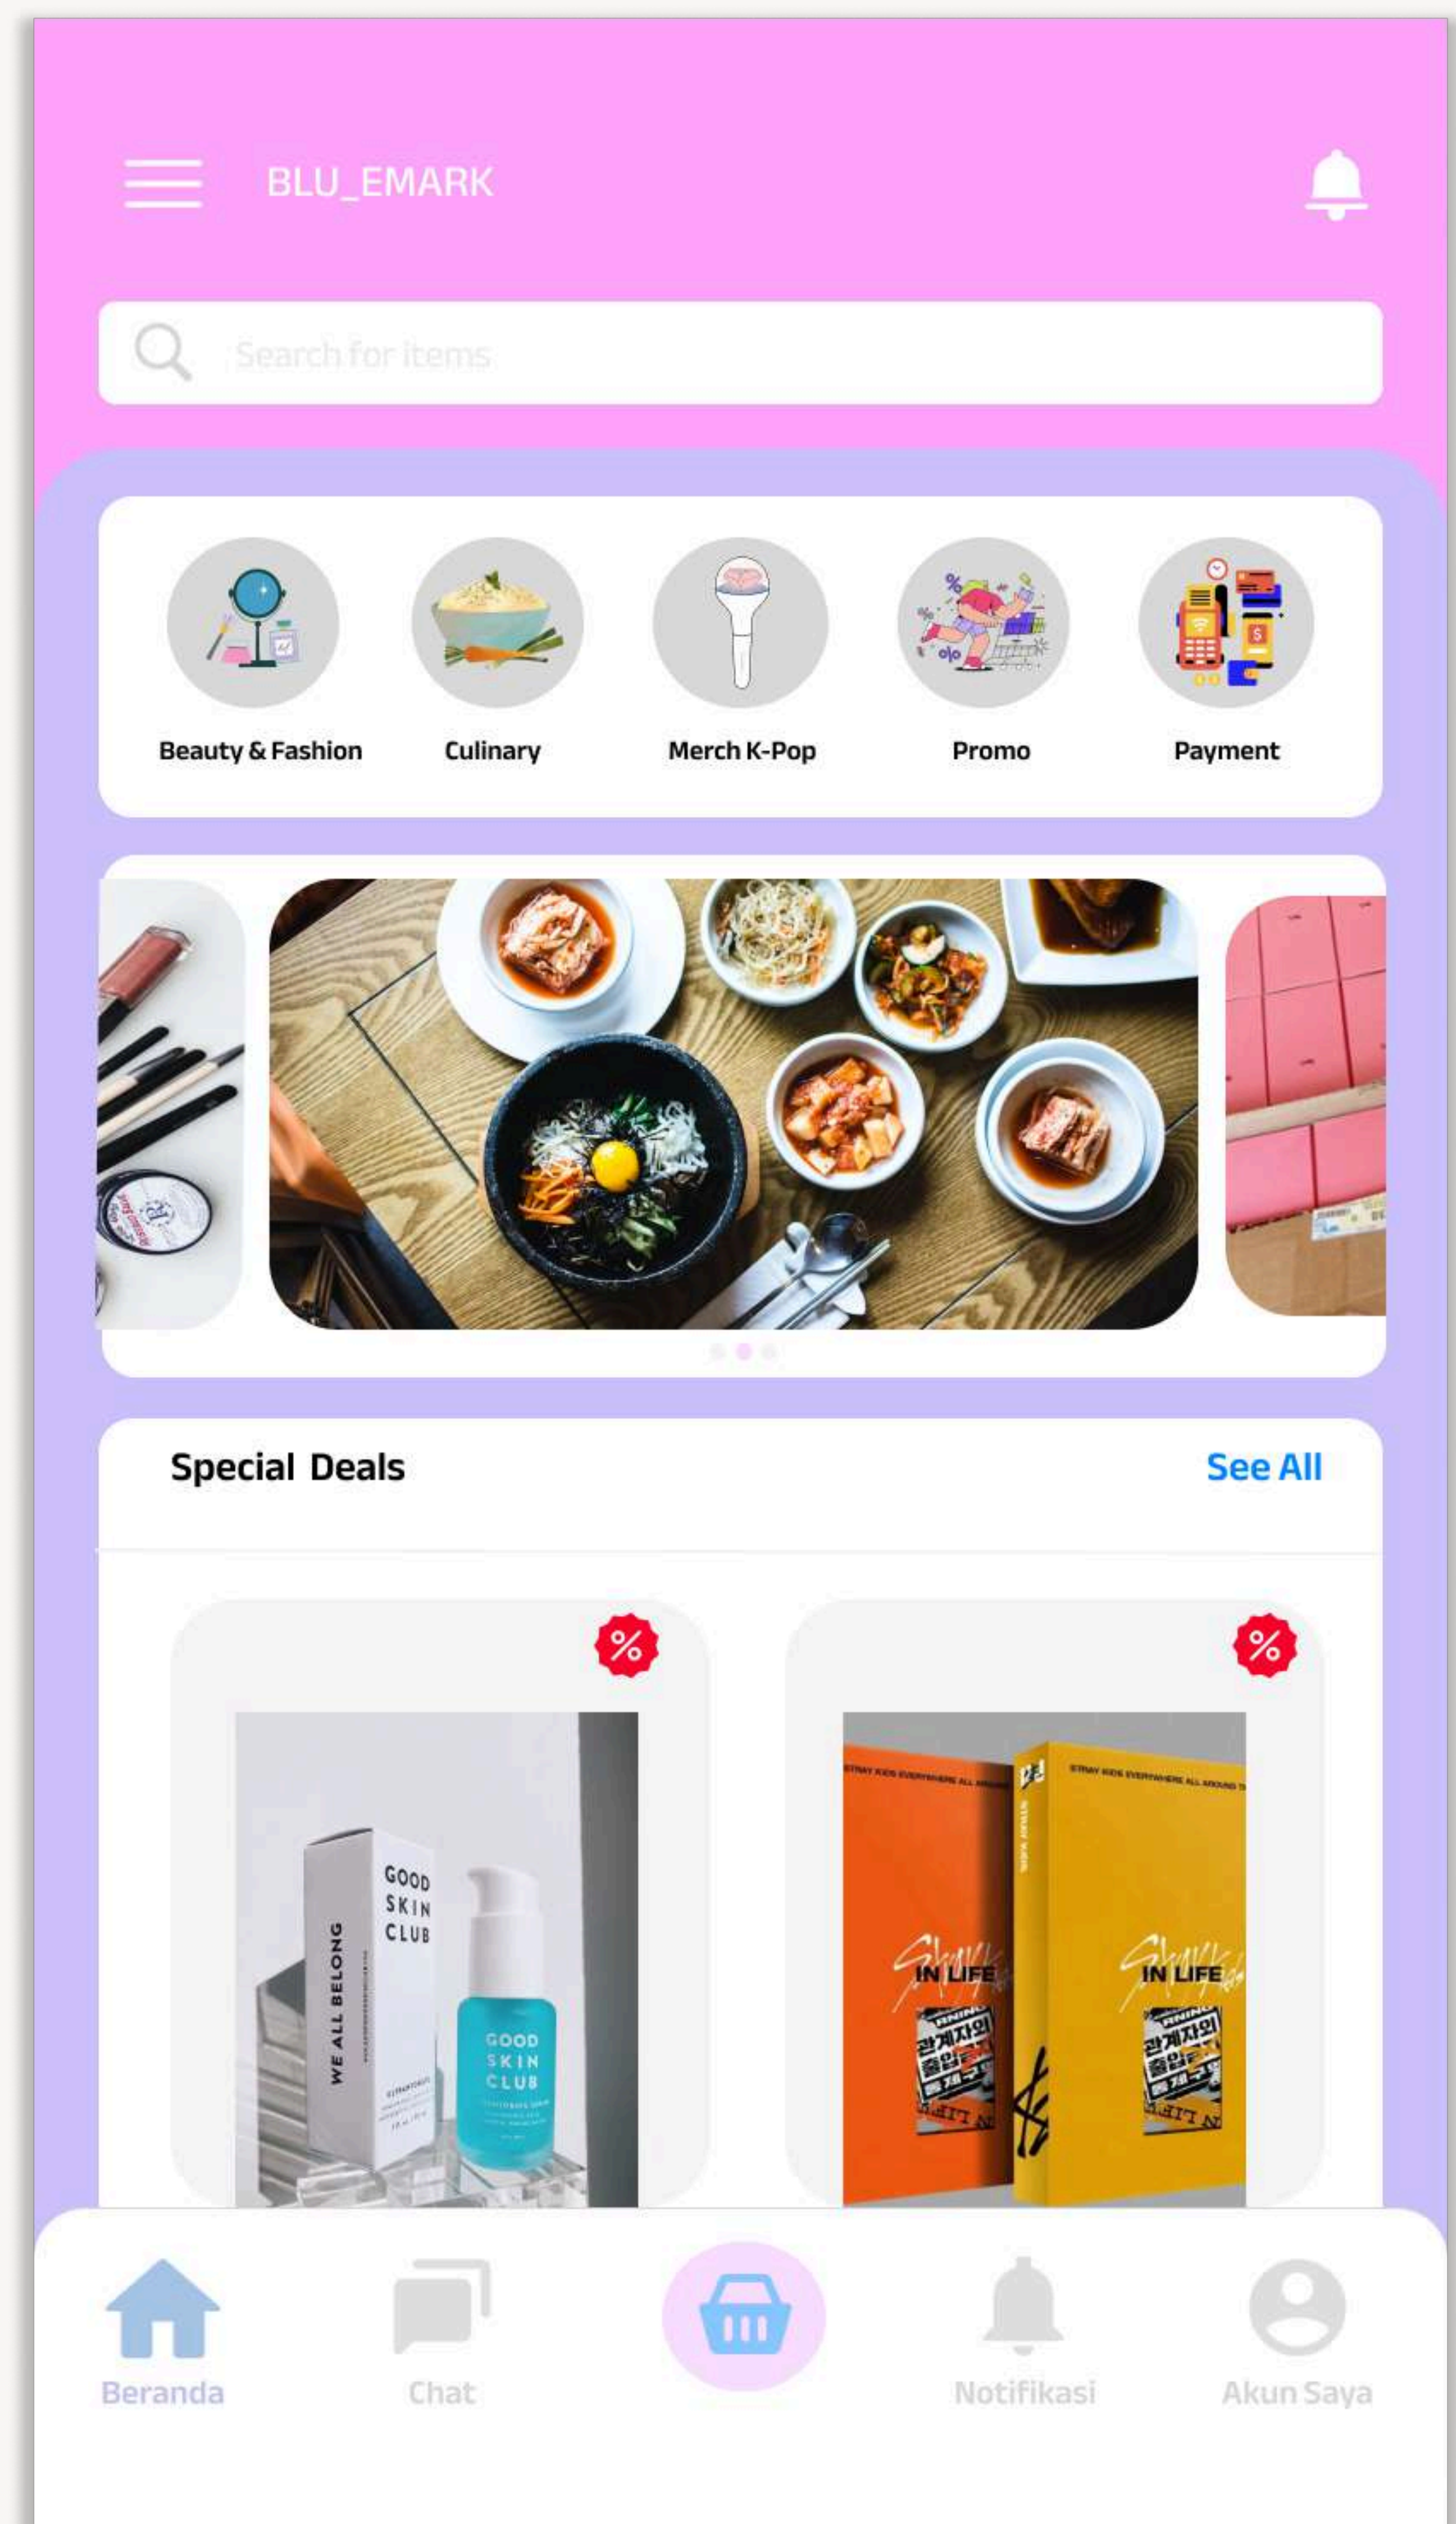

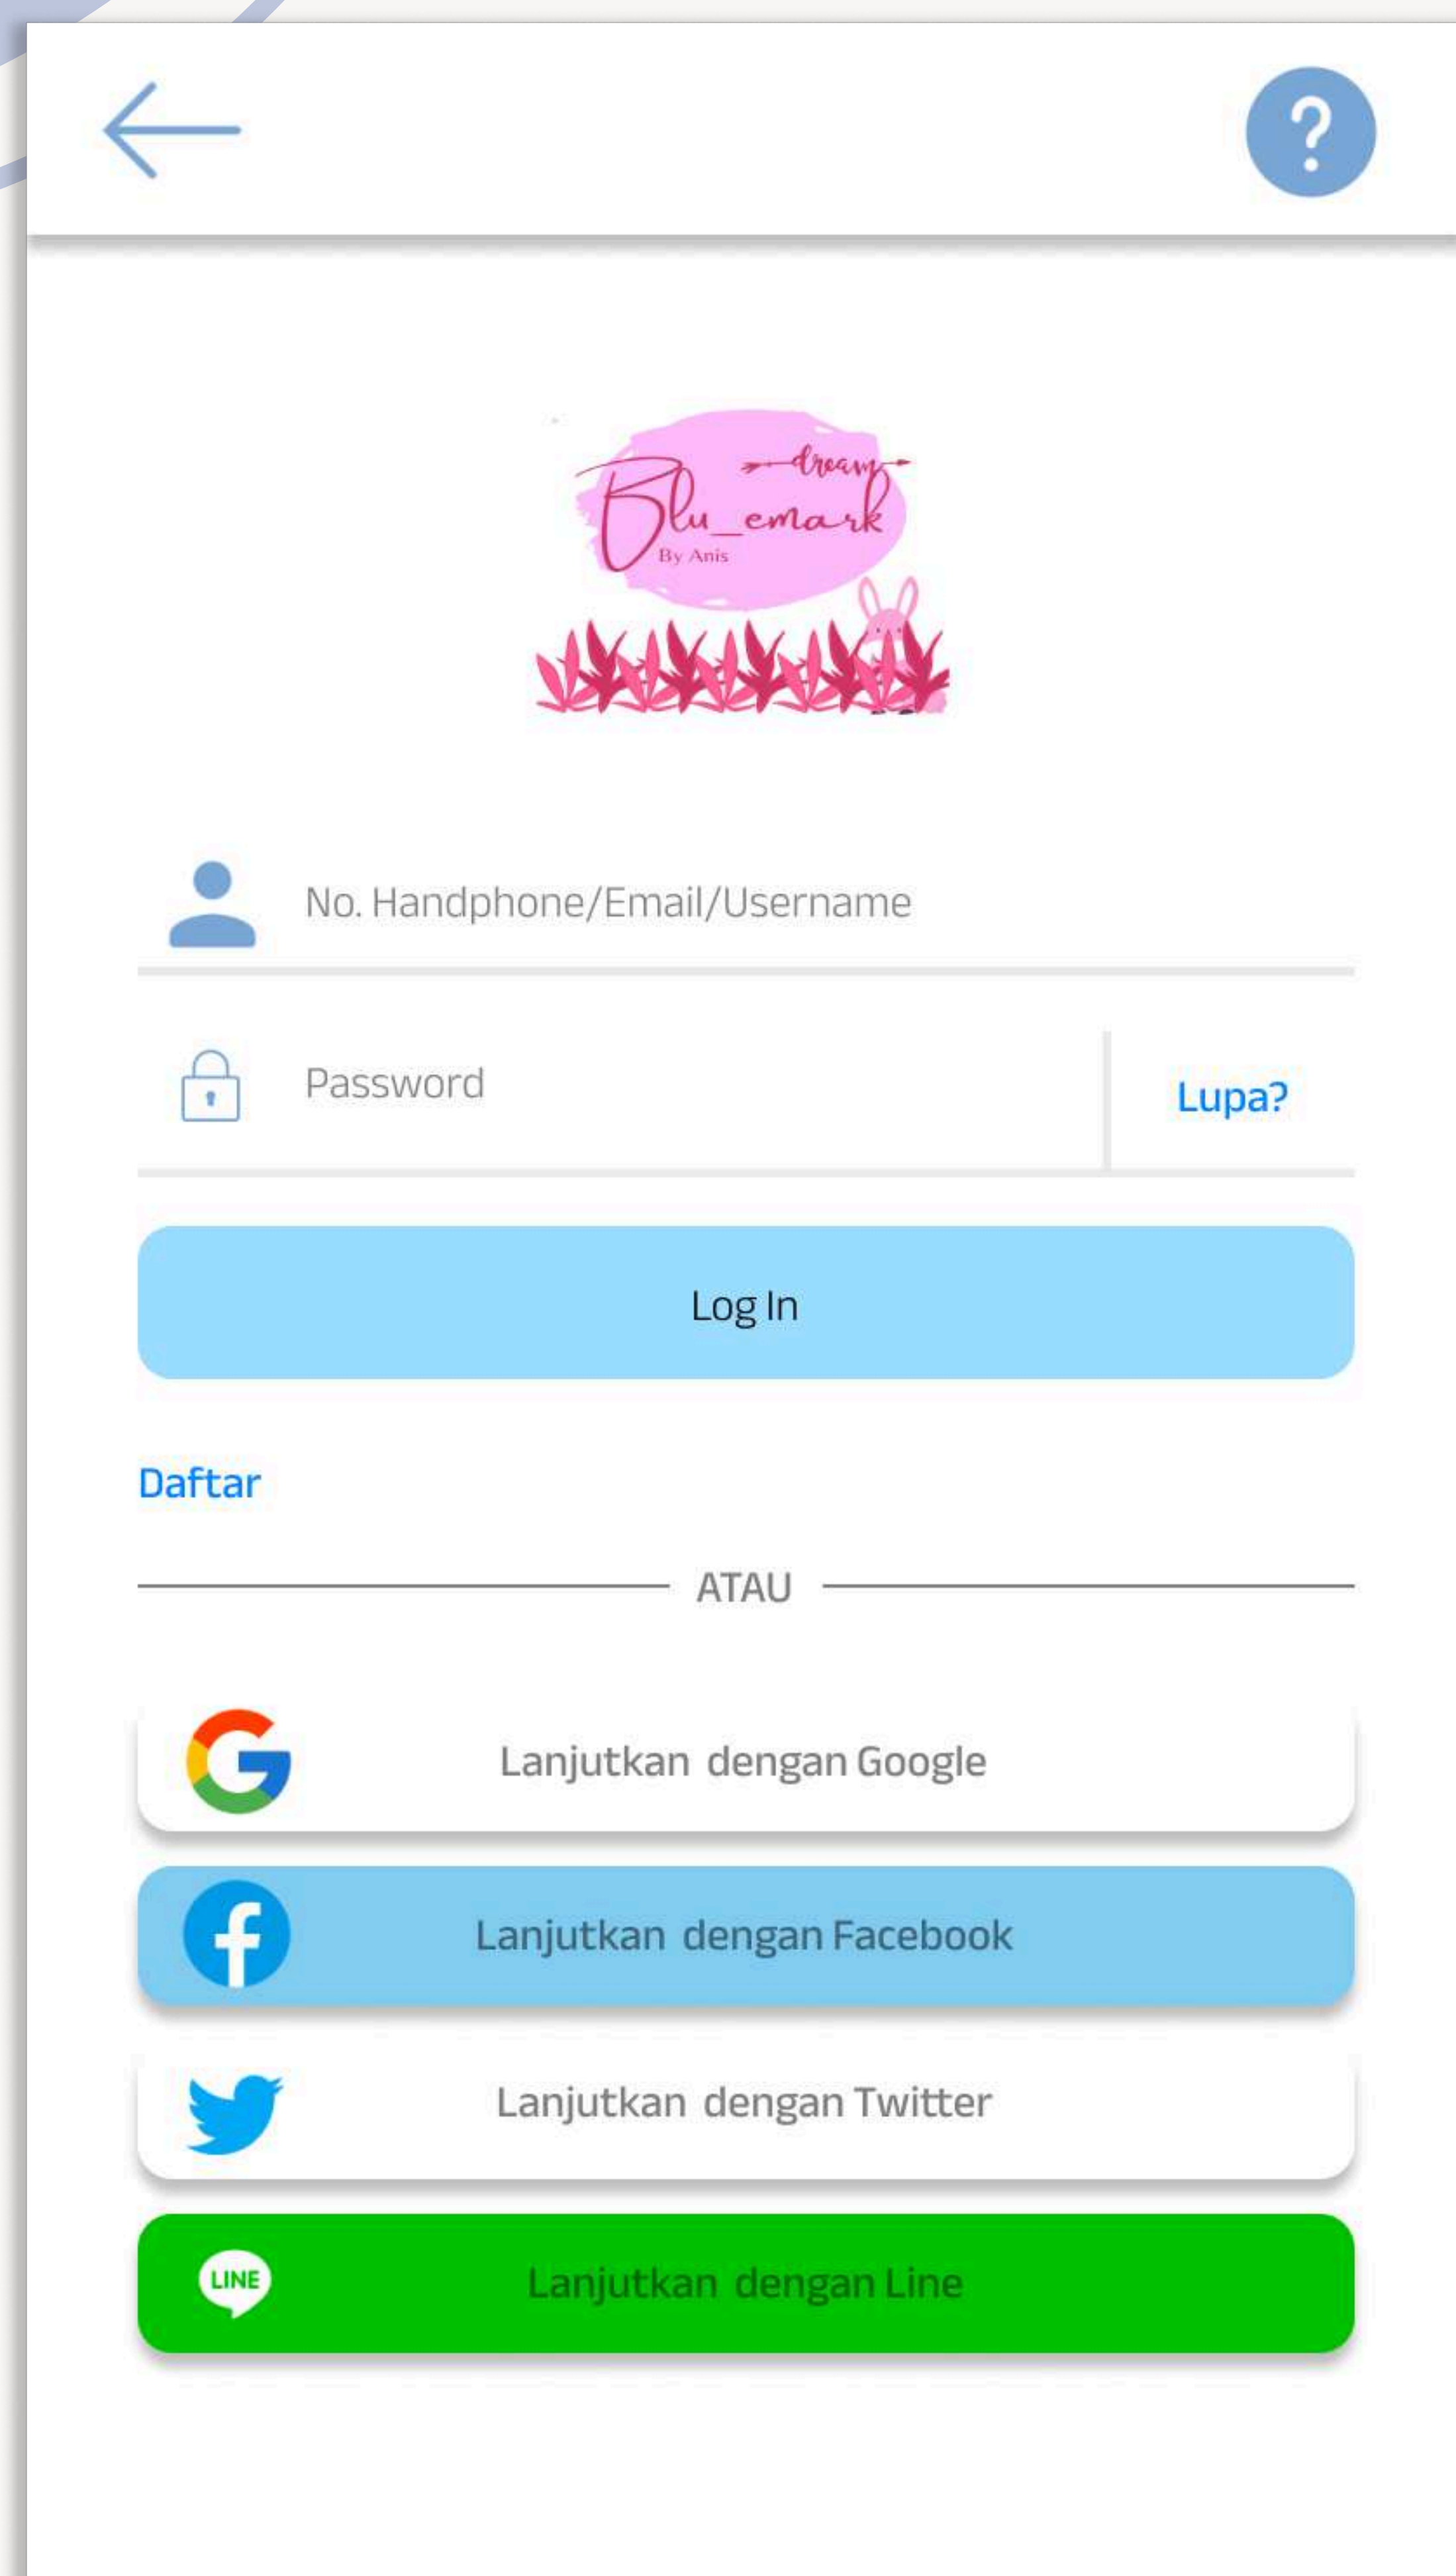

With a sleek, intuitive design, this app helps you organize and track waste effortlessly. Enjoy eco-friendly benefits while reducing clutter—smart, stylish, and sustainable!

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

BLU.EMARK STORE

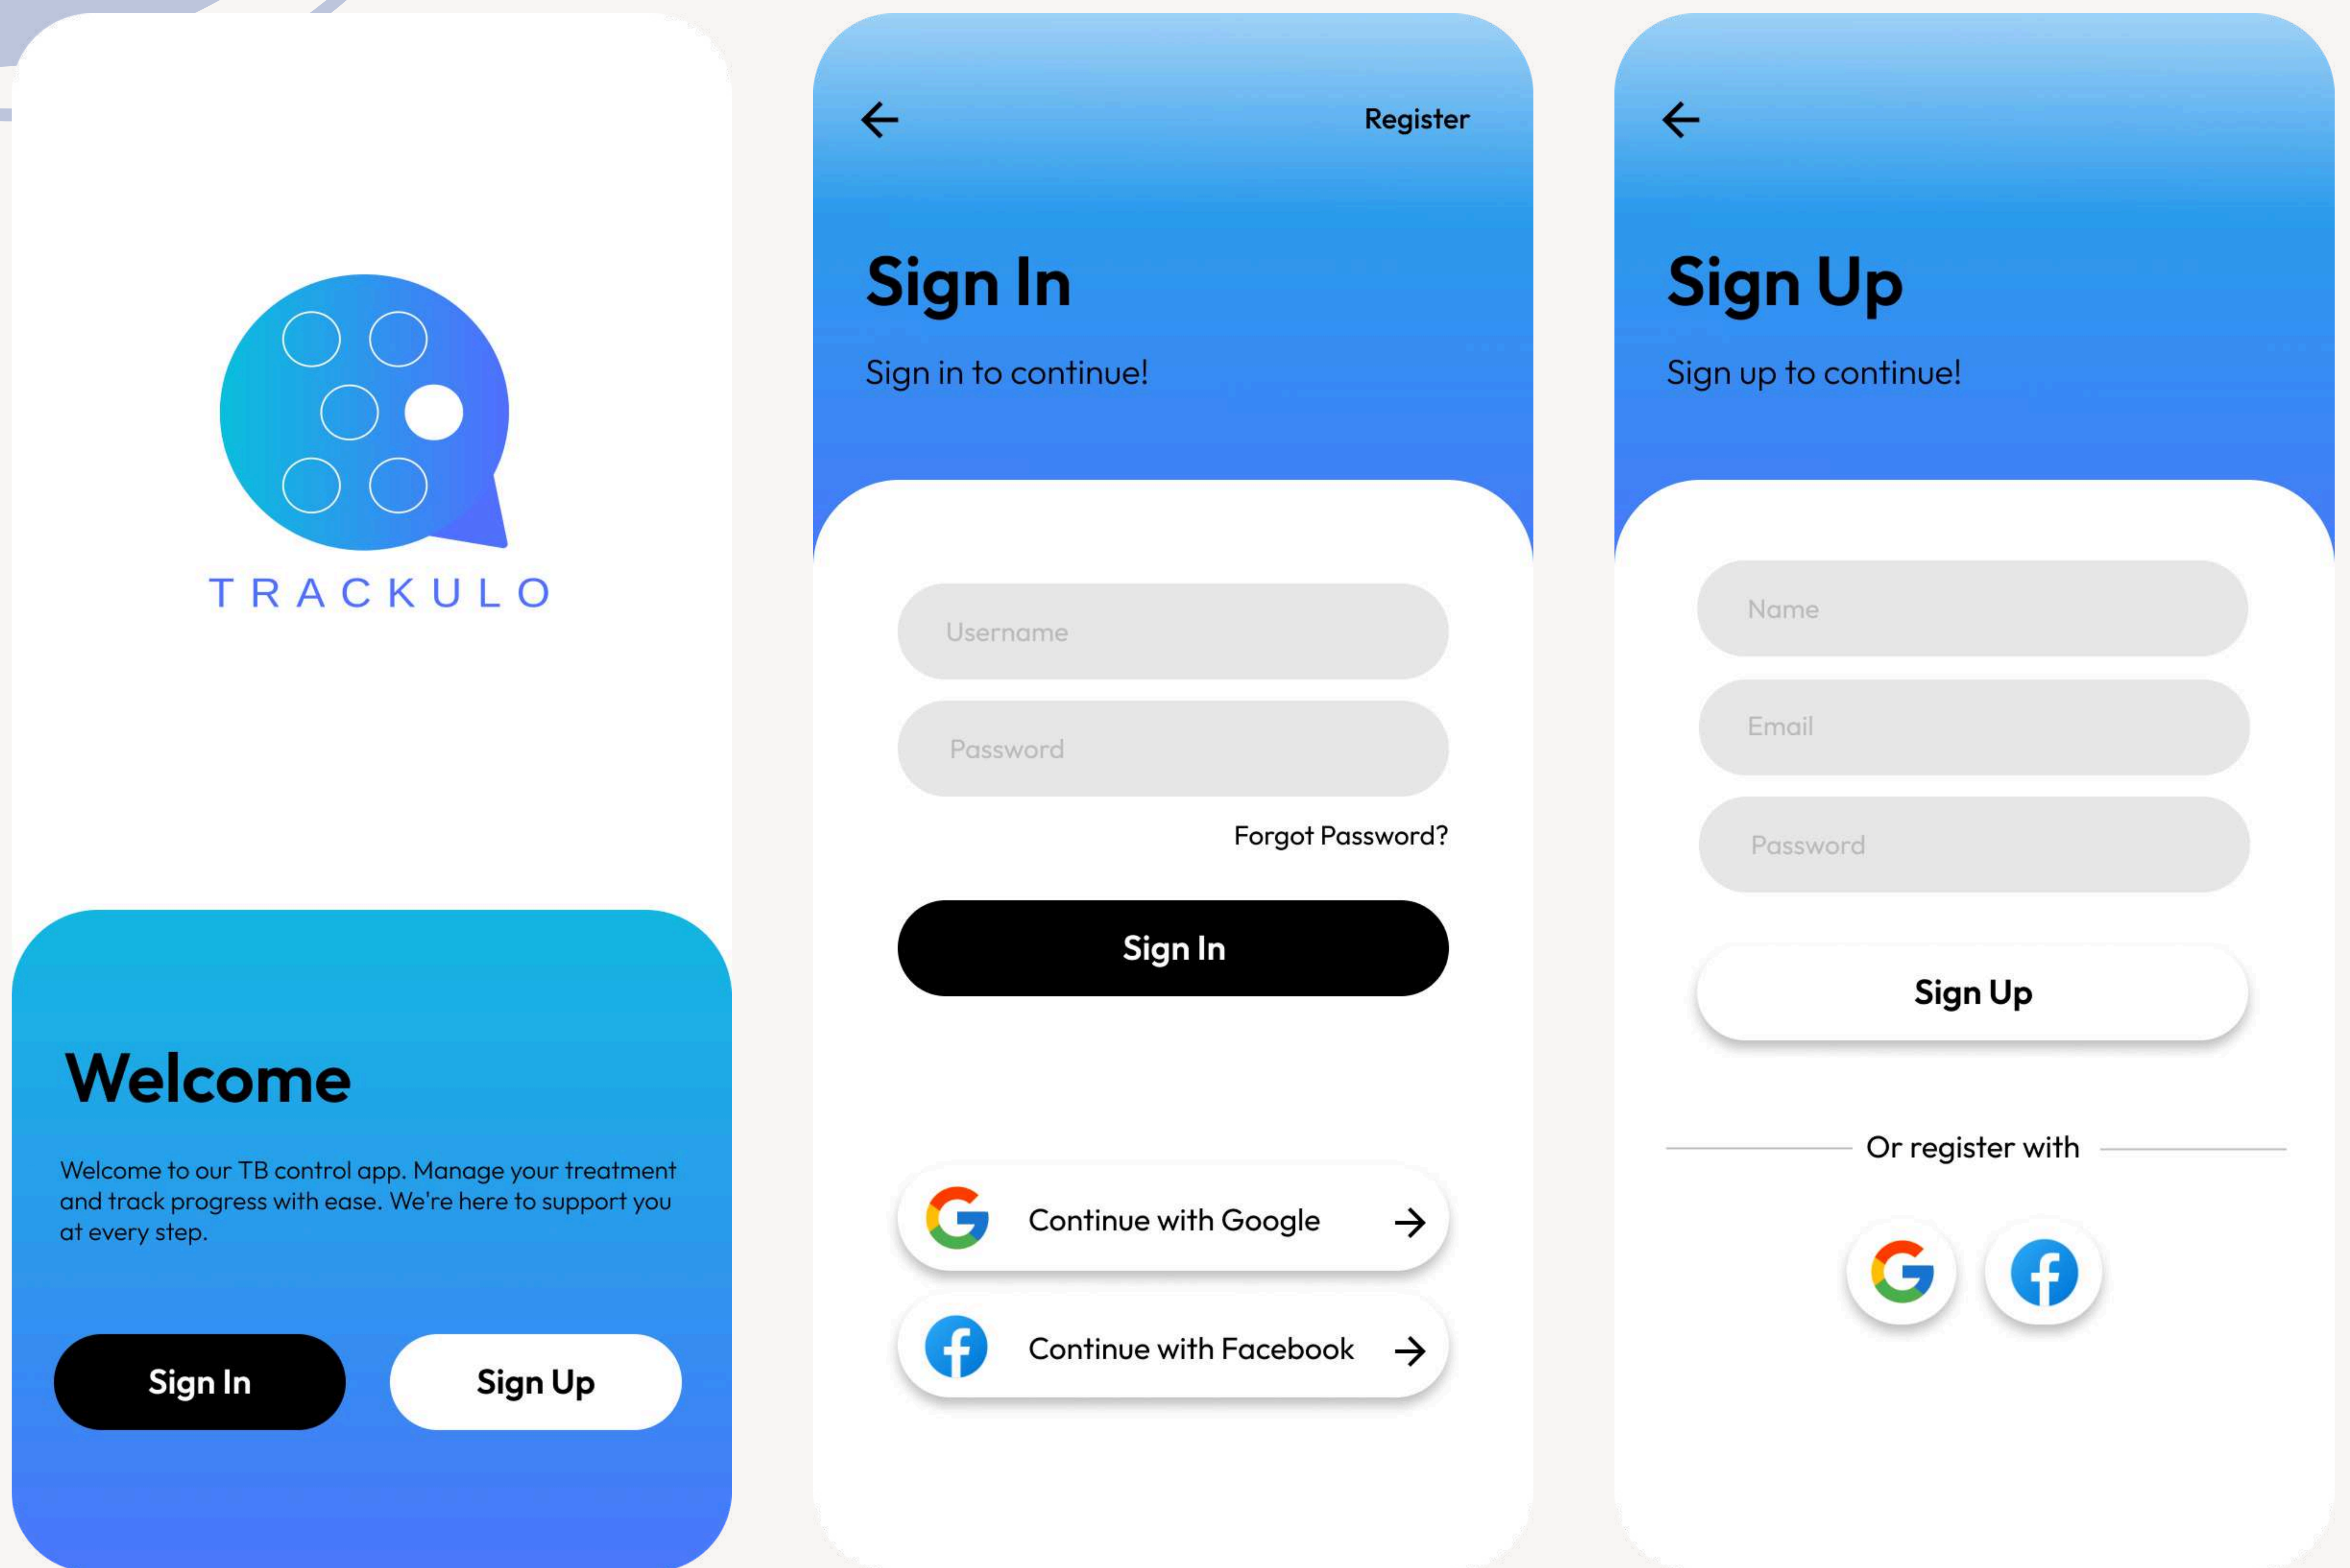

This is an example of online shopping application provides a user-friendly interface with a homepage and login screen. It is designed for K-Pop enthusiasts who regularly make significant purchases and offers a variety of unique merchandise.

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

TRACKULO

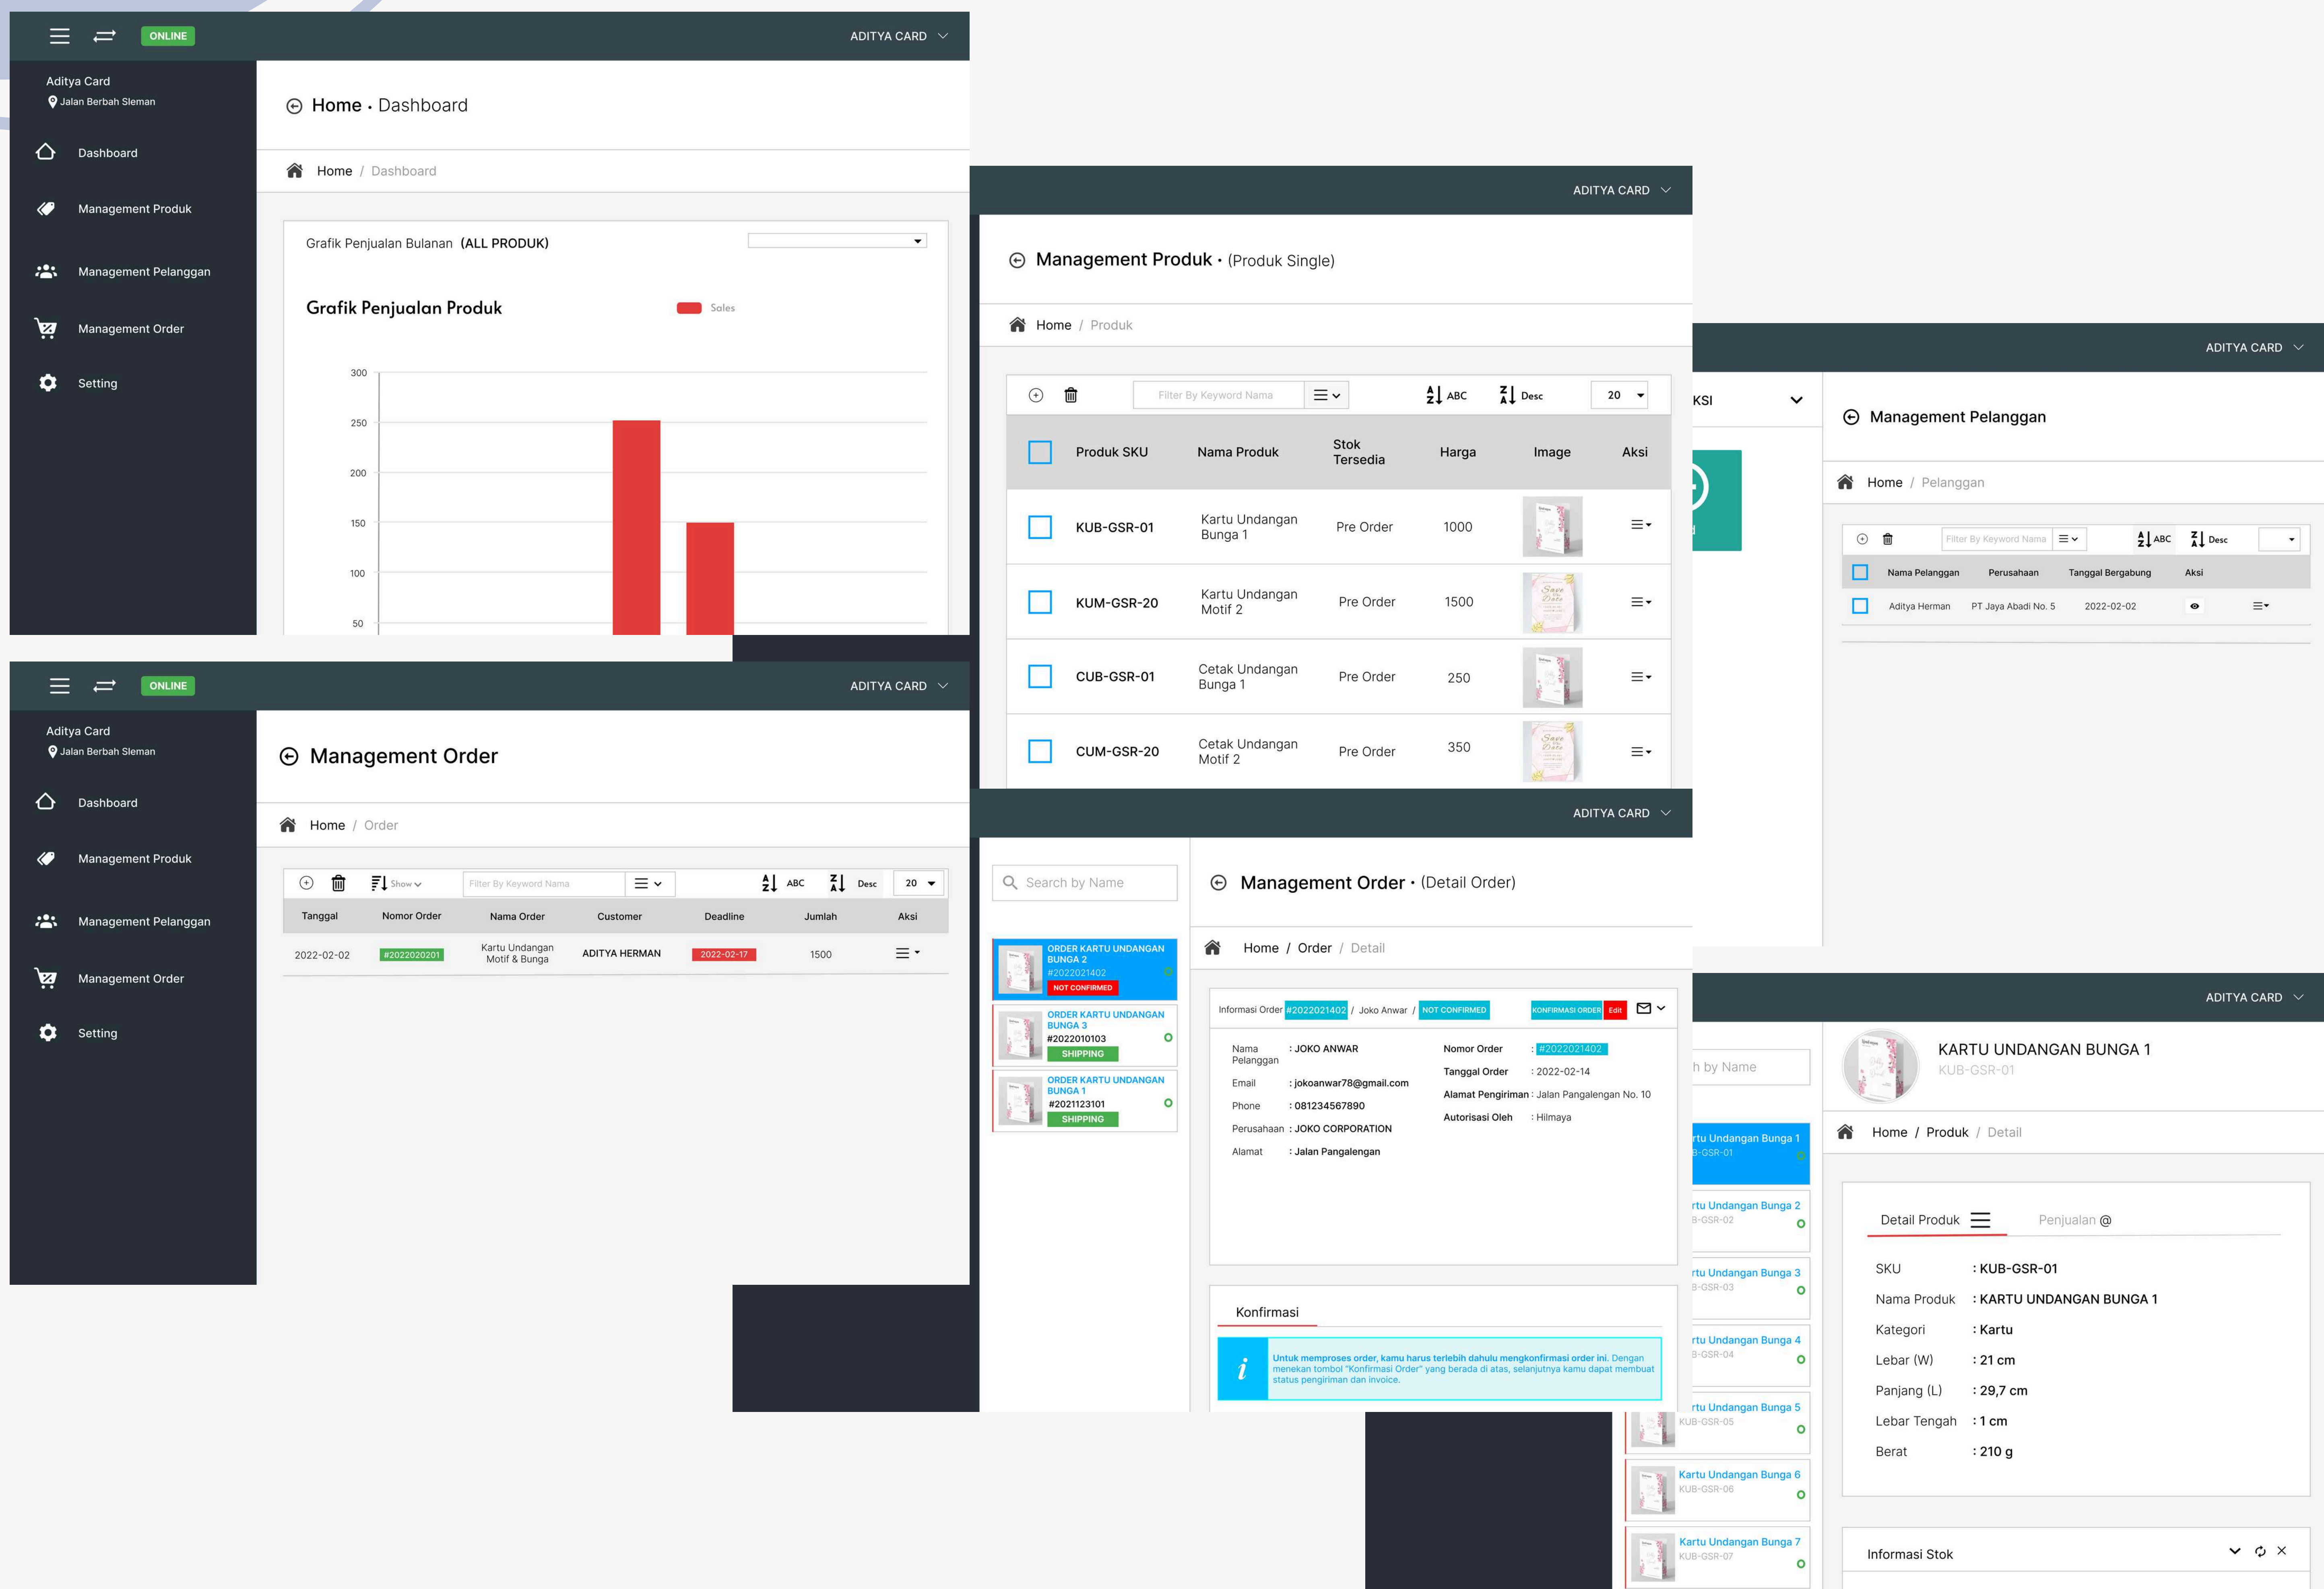

Seamlessly designed for an engaging user experience, the features intuitive opening, sign-in, and sign-up screens.

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

MANAGEMENT DATA WEB

This data management website design empowers admins with efficient tools to oversee stock and sales. With user-friendly dashboards, real-time analytics, and seamless transaction tracking, managing inventory has never been easier.

My responsibility for this project are:

- Analyzing the project requirement.
- Creating user interface designs, including wireframes, prototypes, and visual assets.

FASHIONTRACK.ID

LANDING PAGE

Discover the fashion web's landing page, showcasing the academy's cutting-edge courses, trend insights, and community engagement. Designed to inspire creativity and elevate the fashion journey.

My responsibility for this project are:

- Analyzing the project requirement.
